On behalf of National Grid, the following summarizes response actions to be performed at the above-referenced site during the timeframe from July 1 to 5, 2013.

### SITE ACTIVITIES TO BE PERFORMED

- Complete site observation walk.

The majority of the earthwork associated with the electrical substation upgrade project is complete. Minor excavation (associated with utility conduit) is planned for October 2013. The color-coded alert system indicating when excavation is active (yellow sheet) and not active (blue sheet) will be updated on the bulletin boards prior to the start of the minor excavation work.

GZA will continue to oversee soil management and conduct air monitoring during these earth disturbing activities. Air monitoring will be performed consistent with the summary memorandum which was submitted to RIDEM on September 28, 2012. The remainder of the work associated with the electrical substation upgrade project will consist of aboveground work within the substation and buildings. It is currently anticipated that the aboveground work associated with the substation upgrades will continue until the end of 2013.

GZA anticipates starting the field work associated with the soil gas survey the week of July 8, 2013.

Please contact me at 401-421-4140 Ext. 2719 if you have any questions or comments.
