

Emissions Summary Table for Selected Pollutants

Facility:

Reporting Year 2023

Boiler or Process Originating Air Pollution	Appr. No(s).	Stack No.	Particulate	SO _x	NO _x		VOC ^{1,2}		CO	
			(lb/yr)	(lb/yr)	(lb/yr)	PPSD ³	(lb/yr)	PPSD	(lb/yr)	PPSD
Total										

¹Emission estimates for each Listed Air Contaminant on the purple sheet, ammonia, PM2.5 and PM10 should be recorded in a separate table or spreadsheet. Miscellaneous VOC (Misc. VOC) may be used to report VOCs from fuel burning or to report in the aggregate small quantities of VOCs (<500 lbs.) that are not Listed Air Contaminants.

²Report emissions before and after Rule Effectiveness, if applicable. Label carefully. Previously, RIDEM has used a notation such as 75.46(RE) to denote that an emission estimate has been adjusted for Rule Effectiveness.

³PPSD = Pounds per summer day, i.e., pounds per typical peak ozone season day.
