The use or reuse of any information provided within this document by individuals, without the express written consent of those parties and Pare Corporation is strictly prohibited.

Section 1

Purpose and Scope of Investigation

Pare Corporation (PARE) has prepared this Phase I Environmental Site Assessment (ESA) for property located at 52 Broad Street in Cumberland Rhode Island (Site). The location of the Site is identified on the Locus Map and Site Plan attached hereto as Appendix A and Appendix B, respectively. The Site is currently a Town-owned public park, which is proposed as the site for a new charter school.

This ESA has been conducted in general conformance with the American Society for Testing and Materials (ASTM) Document E 1527-05 - Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, as amended. The purpose of this ESA was to evaluate the Site with respect to the potential presence of "Recognized Environmental Conditions" (REC). Per the ASTM Document E 1527-05, "Recognized Environmental Conditions" shall mean the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. Specific elements of this ESA included the following:

- Records Review: Review of historical and regulatory records readily available from State, Federal, and local agencies concerning the Site and nearby properties, in an attempt to gather information concerning past and present uses or practices, which may reflect REC;
- Site Reconnaissance: Evaluation of the Site for indications of REC and to identify general uses of abutting parcels;
- Interviews/Inquiries: Interview of readily available persons associated with the Site owner and occupants of the Site relative to Site history and use; and
- Interviews with Local Government Officials: Collect information and conduct inquiries of the local regulatory/licensing agencies regarding the Site.

The conclusions provided in this report are based solely on the scope of work conducted and described herein, and are subject to the Limitations provided in Section 6. It is noted that the scope of this ESA specifically excluded an evaluation and/or identification of on-Site building structures and soil for possible asbestos containing building materials (ACBMs), lead-based paint, mold, and radon.

This section provides a description of the Site and Site setting, as well as historical information pertaining to the Site. The location of the Site is identified on the Locus Map provided as Appendix A. A Site Plan is provided as Appendix B.

2.1 Site Description

The Site is an approximately 1.3-acre parcel located at 52 Broad Street in Cumberland, Rhode Island. It is identified as Tax Assessor's Plat 2, Lot 26. It is currently used as a Town-owned public park with recreational facilities, including a basketball court, street hockey court, and skate park.

The Site has paved areas associated with the recreational facilities. Lawn areas, comprising roughly half the Site, surround the recreational sporting areas. Some mature trees exist throughout the lawn areas of the Site. The site is served by electric through underground conduits that originate from an electrical building on the northern edge of the property. The underground electrical system serves stadium lighting used for the sporting areas and also a security camera system. Town water and sewer lines are present throughout the area but it does not appear that they actively serve the Site.

The Site is bounded by Broad Street to the east, residential properties to the north, Chase Street to the west, and a residential property and parking lot along Lusitania Avenue to the south. The area surrounding the Site is heavily developed with a combination of residential, commercial, and industrial uses. Broad Street appears to be a major thoroughfare in this area of Cumberland. The Blackstone River runs through the area and is located to the west and south of the Site, approximately 600 feet to the south of the Site at its nearest point.

According to Rhode Island Department of Environmental Management Geographical Information System (RIGIS) data reviewed by PARE, the Site is partially located within the Lower Blackstone Moshassuck ground water reservoir and the Blackstone River Sub-basin watershed. It is not located within a wellhead protection area or sole source aquifer.

2.2 Physical Setting

Site and Area Topography

The Site is partially cleared, with the exception of mature trees along the north, east, and western edges of the Site. The topography of the Site slopes gently to the east toward Broad Street, but is primarily flat as the Site is used for recreational sports. Topography ranges from approximately 70 feet above Mean Sea Level (MSL) near Broad Street to approximately 80 feet above MSL at Chase Street.

The surrounding area appears to generally slope to the south toward the Blackstone River. The Blackstone River is located approximately 600 feet to the south of the Site at its nearest point. It approaches to within 900 feet of the Site to the west as well. The Blackstone River is a major water body in the area, which flows southerly and ultimately discharges to the Atlantic Ocean at Narragansett Bay.

Surface Water Drainage

Surface water runoff on the northern portion of the Site flows overland toward Broad Street, which contains catch basins and a closed drainage system. Stormwater runoff on the southern portion of the Site appears to flow overland to the south toward two catch basins located along the southern property line. One catch basin is located at the southeastern corner of the property and the other is located on the southern edge of the property, approximately 130 feet west of Broad Street. It is unknown where these catch basins discharge to as PARE could not locate a drainage manhole on the Site or nearby in Broad Street during our Site reconnaissance on May 30, 2012. It is possible that one or both of these structures are open-bottom leaching pits with no outlet pipe, though this too could not be confirmed. PARE did not perform a comprehensive drainage evaluation at the Site to independently verify the configuration and performance of this drainage system.

Shallow Groundwater

Based on surface topography and the Site's proximity to the Blackstone River, a significant water body in this area of Cumberland, the inferred direction of shallow groundwater flow beneath the Site is to the south. Subsequent references to "upgradient" and "downgradient" are relative to this inferred direction of shallow groundwater flow. Localized flow directions in the vicinity of and beneath the Site may vary due to subsurface utilities and heterogeneous subsurface conditions.

Like the Site, regional groundwater is believed to flow toward the Blackstone River. File information reviewed by PARE for properties around the Site report the direction of groundwater flow to be generally in a southerly and westerly direction toward the Blackstone River. As stated before, the Blackstone River is a significant water body in the area, ultimately draining into the Providence River, then to the Atlantic Ocean at Narragansett Bay. Groundwater information reviewed by PARE indicates that the Site is located within a GB groundwater area. Groundwater that is classified by the RIDEM as GB is considered unsuitable for drinking water without treatment due to known or presumed degradation.

Flood Insurance Map

Based on a review of the Federal Emergency Management Agency's (FEMA) Flood Insurance Rate Maps (Providence County, Rhode Island, Map Number 44007C0194G, effective March 2, 2009), the Site is located in a Zone X. Zone X is defined as an area outside those determined to have a 0.2% annual chance of flooding. A portion of this map in the vicinity of the Site is provided as Appendix C.

2.3 Site History and Land Use

This section provides information derived through research, inquiries, and investigations relative to the Site, in order to determine previous owners and uses of the Site that may reflect potential REC.

2.3.1 Current Ownership and Tax Assessor's Field Card

The Town of Cumberland currently owns the Site. The Tax Assessor Field Card and Deed information indicates that the property was granted to the Town of Cumberland from Carolyn C. Currier in 1968. The Tax Assessor Field Card also indicates that fencing, the basketball court, and tennis courts/skate park were built in 1990 and that the Site is approximately 1.3 acres.

Property information provided by the Tax Assessor's office indicates that lots 27 and 31 were added to lot 26 in 2002. Prior to this, it appears that the Site was comprised of the three individual lots. The Tax Assessor Field Card is included as Appendix D.

2.3.2 Ownership History

PARE accessed the Town of Cumberland's Registry of Deeds to obtain ownership history for the Site. The Town has owned the property since 1968 and it was owned by Carolyn C. Currier prior to this. No record of ownership was available prior to 1968. Historical aerial photography and certified Sanborn maps reviewed by PARE indicate that there was a dwelling and automobile garage at the Site at the time

the Town took ownership of the property. These records suggest that the building structures were demolished sometime in the early to mid-1970s. It is unknown whether these buildings were served by any aboveground or underground storage tanks.

2.3.3 Historical City Directories

Environmental Data Resources, Inc. (EDR) provided PARE with Historical City Directories for the Site and nearby and abutting parcels. EDR searched available business directories including city, cross-reference, and telephone directories for the years 2008, 2000, 1995, 1990 and 1985. The EDR City Directory Report is included in Appendix E.

The Site was not identified in any of the city directories, consistent with its use as a public park. The property to the south of the Site, identified as Plat 2 Lot 25, is listed in the 1995, 1990, and 1985 city directories as 50 Broad Street. No information was given on ownership of 50 Broad Street in the City Directories. PARE researched ownership history at the Town Hall on June 6, 2013 and discovered that the owner of 50 Broad Street is Club Juventude Lusitania, who purchased the property in 1978 from Joseph, Stanley, and Katarizyna Zajchowski. Otherwise, the properties identified in the area around the Site suggest a mix of residential and commercial development that appears to exist today.

2.3.4 Sanborn Fire Insurance Maps

EDR provided Sanborn Fire Insurance Maps for the Site and surrounding area for the years 1965, 1947, 1923, and 1902. Copies of the Sanborn maps are provided in Appendix F.

The 1965, 1947, 1923 and 1902 Sanborn Maps depict the Site as containing a two story residential dwelling and an additional adjacent automobile garage. The Site is shown similarly on each of the maps provided by EDR. Abutting and nearby properties depicted on the Sanborn Maps include the Town Hall, dwellings, apartment buildings and shops. The 1965 and 1947 Sanborn Maps depict three underground storage tanks (USTs) along with a vehicle service and gas station directly abutting the Site to the south. PARE contacted the owner of this property, Club Juventude Lusitania, to determine if they had any knowledge of these USTs, whether they were closed in place or removed, or if they had knowledge of the property's former use as a service station. Thus far PARE has been unable to speak to anyone at the club with knowledge about the history of the property. The property was not identified as a UST site by EDR and there were no records of USTs on file at the RIDEM or the Fire Department.

2.3.5 *Aerial Photographs*

EDR provided aerial photographs of the Site and surrounding area for the years 2012, 2010, 2008, 2006, 2005, 2002, 1995, 1992, 1985, 1981, 1977, 1970, 1969, 1961 and 1955. PARE's comments pertaining to these photographs are summarized below and should be reviewed with consideration of the scale of the photographs. As such, no attempts were made to discern Site-specific features due to the scale of the photographs. Copies of the aerial photographs provided by EDR are enclosed as Appendix G.

Aerial photographs from 1995 to 2012 show the Site generally as it exists today. The photographs show that the Site was developed into the basketball court, skate park, street hockey court, and park sometime between 1985 and 1995. This is consistent with the Tax Assessor's information for the Site which suggests that these improvements may have been made around 1990. Between 1970 and 1977 the former dwelling and adjacent structure was demolished. It is unknown exactly how long these structures remained on the Site or whether they were used in any way following the Town of Cumberland taking over ownership of the property in 1968.

The filling station immediately to the south of the Site appears to exist in the aerial photographs from 1955 to 1977. Subsequent photographs show it as a vacant lot until it appears as a parking lot in the 1992 photograph, which is the current use of the property. The property is owned by Club Juventude Lusitania who uses it for parking for their nearby social club.

The area surrounding the Site appears largely unchanged between each of the photographs between 1955 and 2012, and the area appears generally as it exists today. Much of the development in the area appears to be dense and a mixture of residential and commercial uses. Industrial uses are also in the area, particularly along the Blackstone River south and west of the site.

2.3.6 *Historical Topographic Maps, USGS*

In addition to conducting a review of aerial photographs, PARE also reviewed historical USGS Topographic Quadrangle Maps provided by EDR for the years 1998, 1987, 1979, 1975, 1970, 1949, 1944, 1915 and 1894. Copies of these maps are included in Appendix H. As with PARE's review of the aerial photographs, the purpose of this review was to evaluate general land use and development patterns of the Site and surrounding area. PARE's comments pertaining to these maps are summarized below and should be reviewed with consideration of the scale of the maps. No attempts were made to discern Site-specific features from these maps.

Between 1998 and 1970, the maps show no significant change in the Site in terms of buildings and contours. The present day dense development that exists all around the Site is depicted on these

maps. There also appears to be railroad tracks to the east of the Site. Other topographic maps reviewed by PARE, for the time period between 1894 and 1970, show increasing development to the north of the Site. The railroad tracks to the east of the Site that exist today are shown on in each of the maps dating back to 1894.

Section 3

Regulatory Agency Records Review and Interview

The objective of the records review was to attempt to identify environmental permits, incidents, complaints, violations, response actions, and remediation activities relating to owners, operators, and tenants of the Site and nearby properties within ASTM E1527-05 minimum search distances from the Site, that were on file and readily accessible for review from Federal, State and local regulatory agencies. The basis for much of this review was an environmental records review completed by Environmental Data Resources, Inc. (EDR). The extent of this EDR Report included a database search of specific regulatory agencies within predefined search distances from the Site in accordance with ASTM E1527-05 protocol. The findings of the EDR Report are incorporated into this document by reference. A copy of this report is provided in Appendix I, which includes a complete listing of searched databases.

Files selected for additional review at the Rhode Island Department of Environmental Management (RIDEM), performed on June 4, 2013, were chosen based on information provided in the EDR Report, the locations of the properties relative to the Site, and the inferred direction of shallow groundwater flow. Only those properties with issues considered to pose a potential significant threat in terms of reflecting the presence of REC at the Site were selected for additional review.

For purposes of this investigation, immediate abutters shall be defined as any real property or properties, the borders of which are contiguous or partially contiguous with those of the Site, or that would be contiguous or partially contiguous with those of the Site, but for a street, road, or other public right-of-way.

3.1 Federal, State and Local Regulatory Agency Review/Listings

3.1.1 EPA CERCLA and NPL Listing*

Records pertaining to the United States Environmental Protection Agency (EPA) Comprehensive Environmental Response Compensation and Liability Act (CERCLA) and National Priority List (NPL) were reviewed. The records review included the Site and nearby sites within ½-mile for

*The CERCLA list is a means whereby federal and state agencies identify a potentially contaminated site for additional investigation. Inclusion on the list means that oil or hazardous waste/materials are, or at one time were, used and/or stored at the Site and, therefore, represent a potential for adverse environmental impact. Appropriately, following investigation of a potentially contaminated CERCLA site, if it is determined that the site poses an immediate threat to human health or the environment, the site would be classified on the National Priorities List (NPL). NPL sites are those sites that are slated for further investigation and ultimately, remediation.

CERCLA sites and 1 mile for NPL sites. The Site itself was not mapped as a CERCLA or NPL location but three properties were mapped within the specified search distances from the Site. One site was mapped as a CERCLA-NFRAP, which are archived sites that have been removed and archived from the inventory of CERCLA sites due to the EPA determining that no further steps will be taken to list the site on the National Priorities List, unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. Below is a list of properties that were mapped as CERCLA, NPL, and/or CERCLA-NFRA sites:

- Pawtucket Water Supply Board at Myrtle Street
- Central Falls Dump Adjacent Valley Falls
- Dytex Chemical Co. 1280 High Street Central Falls RI 02863

All three properties were mapped to the south or southeast of the Site, on the other side of the Blackstone River. Due to the physical separation of the Blackstone River between the Site and these three CERCLA properties, it appears unlikely that they represent a significant threat of REC at the Site.

3.1.2 Resource Conservation and Recovery Information System (RCRIS)

The RCRIS databases include sites which handle hazardous materials and wastes, and which are registered with the EPA as such. The RCRIS databases searched by EDR include Treatment, Storage, and Disposal Facilities (TSDF) within a ½-mile of the Site as well as hazardous waste generators within a ½-mile of the Site.

Thirteen properties were identified as Small Quantity Generators (RCRA-SQG) within the specified RCRIS search distance. A SQG generates between 100 and 1,000 kilograms per month of hazardous waste. One property, the Osram Sylvania Precision Mater at 1193 Broad Street, was identified as a Large Quantity Generator (RCRA-LQG) within the specified RCRIS search distance. A LQG generates over 1,000 kilograms per month of hazardous waste or over 1 kilogram of acutely hazardous waste per month. Being listed as a hazardous waste generator does not in itself constitute a likely threat of REC at the Site, though the Osram Sylvania facility was also identified as a Leaking Underground Storage Site (LUST project #0418-ST). PARE did not review this LUST file as this property is located greater than ¼-mile south of the Site and on the other side of the Blackstone River.

3.1.3 State Hazardous Waste Sites (SHWS)

State Hazardous Waste Sites (SHWS) are sites that are, or were, under investigation by Rhode Island Department of Environmental Management (RIDEM) authorities for potential hazardous waste releases or violations. The Site was not identified as a SHWS; however, the EDR Report identified 22 SHWS within approximately one mile of the Site. Available files were reviewed for some of these sites at the RIDEM office on June 4, 2013. Files selected for review were chosen based on their location and the perceived likelihood of posing a threat of REC at the Site. Many of these facilities were also identified as LUST sites and are discussed in Section 3.1.5. Properties not selected for review are those believed to be located downgradient from the Site or in a position where the potential for REC at the Site is thought to be unlikely based on other information reviewed by PARE.

Only one SHWS was selected for review based on the location of SHWS mapped by EDR, as summarized below.

1420 Broad Street, Central Falls, RI

The property located at 1420 Broad Street in Central Falls is approximately 950 feet south of the Site. It was identified as a RIDEM State Hazardous Waste Site (CFL-HWM) due to a Phase I/II ESA identifying contamination of groundwater at the property. It is located on the other side of the Blackstone River from the Site, and file information reviewed by PARE confirmed that groundwater flow was toward the river. As such, it appears unlikely that this release represents a significant threat of REC at the Site.

3.1.4 State Solid Waste Landfills (SWF/LF)

SWF/LF are active or inactive solid waste disposal facilities. The Site was not identified as an active or inactive landfill and there were no SWF/LF facilities identified within one mile of the Site.

3.1.5 Leaking Underground Storage Tanks (LUST)

The EDR Report identified sixteen Leaking Underground Storage Tank (LUST) sites within approximately ½-mile of the Site. Available files were reviewed for some of these sites at the RIDEM on June 4, 2013. Files selected for review were chosen based on their location and the perceived likelihood of posing a threat of REC at the Site. Properties not selected for review are those believed to be located downgradient from the Site or in a position where the potential for REC at the Site is thought to be unlikely based on other information reviewed by PARE. The RIDEM LUST files reviewed by PARE are summarized in the following parts of this section.

94 Broad Street, Cumberland, RI

The property located at 94 Broad Street is approximately 280 feet north of the Site. It was identified as a RIDEM LUST site (LUST project number: 0818-LS) on April 26, 1994 and Spill site (Spill report number: 3883) on November 16, 1989. RIDEM did not have any Spill report files available for this property, but PARE did review the LUST file.

On November 9, 1994 one 6,000 gallon gasoline tank, one 4,000 gallon gasoline tank, two 3,000 gallon gasoline tanks, one 2,000 gallon diesel tank, and one 1,000 gallon No. 2 fuel oil tank were all closed at the property. During tank closure, approximately 270 cubic yards of contaminated soil was removed from the property. No groundwater was reportedly encountered during tank removal.

A Limited Site Investigation Report (LSIR) was prepared by FJA Environmental Associates on November 6, 2001. As part of this LSIR, three groundwater monitoring wells were installed and groundwater sampling was conducted. Groundwater samples that were collected and analyzed did not result in an exceedance of regulatory limits for petroleum based contaminants. As such, a letter of No Further Action was issued by the RIDEM on November 13, 2001.

Based upon file information reviewed by PARE, it does not appear that groundwater in the vicinity of the Site has been impacted to a significant degree by this release. Also, groundwater measurements recorded during the LSIR indicated groundwater flow to be westerly toward the Blackstone River, making it potentially cross-gradient from the Site. Therefore, it appears unlikely that this release represents a significant threat of REC at the Site.

2 Chase Street Cumberland, RI

The property located at 2 Chase Street is approximately 500 feet south of the Site. It was identified as a RIDEM LUST site (LUST project number: 0822-LS) on October 17, 1994 due to a petroleum release.

A UST Closure report was prepared by Coneco Environmental on November 17, 1994, which indicated that two 10,000 gallon USTs were removed from the property along with 118 tons of contaminated soil. According to the closure report no evidence of onsite migration was observed and it does not appear that groundwater was encountered or investigated. The RIDEM issued a letter of No Further Action dated February 8, 1995.

Based upon file information reviewed by PARE, it does not appear that groundwater in the vicinity of the Site has been impacted to a significant degree by this release. Therefore, it appears unlikely that this release represents a significant threat of REC at the Site.

30 Meeting Street, Cumberland, RI

The property located at 30 Meeting Street is approximately 750 feet southwest of the Site. It was identified as a RIDEM LUST site (LUST project number: 0829-LS) on April 4, 1995 due to a petroleum release.

A UST Closure Report was performed by Clean Environment Inc. on May 6, 1995. The report indicated that an 8,000 gallon No. 6 fuel oil tank was pulled at the property on April 4, 1995. Free phase product, along with groundwater, was observed during the UST closure. Approximately 49 tons of contaminated soil was removed from the property during the UST closure.

A Site Investigation Report (SIR) prepared by Clean Environment Inc., dated February 8, 1997, attempted to define the limit of petroleum contamination from the former 8,000 gallon fuel oil tank, which resulted in the excavation of approximately 385 tons of additional contaminated soil. A second SIR report, again prepared by Clean Environment Inc. and dated July 1, 1998, indicated that two monitoring wells were installed on May 19, 1998 along the westernmost edge of the property near the Blackstone River to determine any impacts to groundwater caused by the release. Although no groundwater contours were provided, due to the close proximity of the Blackstone River, groundwater is assumed to flow toward it to the west. Sampling of the monitoring wells did not detect any petroleum products; as such, the RIDEM issued a letter of No Further Action on October 7, 1998.

Based upon file information reviewed by PARE, it does not appear that groundwater in the vicinity of the Site has been impacted to a significant degree by this release. Therefore, it appears unlikely that this release represents a significant threat of REC at the Site.

50 Mill Street, Cumberland, RI

The property located at 50 Mill Street is approximately 760 feet east of the Site. It was identified as a RIDEM LUST site (LUST project number: 0832-LS) on January 22, 1996 due to a petroleum release.

UST closures for a 3,000 gallon and 2,000 gallon diesel fuel oil tanks were performed on January 22, 1996. Approximately 40 cubic yards of contaminated soil was removed from the site during the UST closures. Confirmatory sampling indicated levels of TPH exceeding the RIDEM Residential Direct

Exposure Criteria of 500 mg/kg at two locations. The RIDEM issued a letter indicating removal of the property from Active LUST status to Inactive LUST status. No groundwater investigation was indicated in the closure report, suggesting that groundwater is not believed to have been impacted as a result of this release.

Based upon file information reviewed by PARE, it does not appear that groundwater in the vicinity of the Site has been impacted to a significant degree by this release. Therefore, it appears unlikely that this release represents a significant threat of REC at the Site.

49 Abbot Street, Cumberland, RI

The property located at 49 Abbot Street is approximately ¼-mile northeast of the Site. It was identified as a RIDEM LUST site (LUST project numbers: 0831-LS and 0831A-ST) on August 13, 1996 and again on July 18, 2006, respectively, due to petroleum releases.

Alliance Environmental Group (AEG) performed a UST tank closure on July 19 and 26, 2006 of three 10,000 gallon Number 2 fuel oil tanks. During the UST tank closure, AEG noticed that soil showed signs of coal ash and petroleum impacts. Four monitoring wells were installed on February 6, 2007, and sampled on May 25, 2007. Samples indicated that naphthalene was above the GA groundwater objective. As a result of this, the property is required by the RIDEM to perform quarterly groundwater monitoring. The last groundwater sampling data reviewed by PARE, dated May 2012, indicates that naphthalene remains above the GA groundwater objective in two of the wells. Groundwater flow direction at this property is reported to be to the southwest, toward the Site and eventually to the Blackstone River.

Based upon file information reviewed by PARE, groundwater in the vicinity of the Site may have been impacted as a result of this release. Therefore, this release represents a potential REC for the Site as it is presumed to be downgradient from this property.

9 Havens Street Cumberland, RI

The property located at 9 Havens Street is approximately ½-mile northeast of the Site. It was identified as a RIDEM LUST site (LUST project number: 0859-LS) on October 20, 2009 due to a petroleum release.

Closure of a 12,000 gallon No. 4 fuel oil UST and a 5,000 gallon No. 2 fuel oil UST was performed on October 20 and 23, 2009. Gordon R. Archibald Inc. prepared a closure report dated December 11,

2009. The closure report indicated that approximately 202 tons of contaminated soil was removed during the tank closures. No groundwater was encountered during the tank closure and soil removal to a depth of 28 feet below grade. Confirmatory samples that were analyzed indicated that only one location below the 12,000 gallon tank contained TPH in excess of the RIDEM Residential threshold following the soil removal. No further information was available to indicate further soil removal. On February 25, 2010, RIDEM changed the status from active LUST site to an inactive LUST site. No further information is provided in the file to indicate if additional remediation has taken place.

Based upon file information reviewed by PARE, it does not appear that groundwater in the vicinity of the Site has been impacted to a significant degree by this release. Therefore, it appears unlikely that this release represents a significant threat of REC at the Site.

3.1.6 Underground Storage Tanks (UST)

The EDR Report identified twenty five underground storage tank (UST) facilities within a ½-mile of the Site. The Site was not identified as a UST site by EDR. Nine of the UST properties are in locations presumed to be upgradient of the Site. Seven of the properties with a documented UST were also listed as LUST facilities, and those that were deemed to have a potential for REC at the Site were reviewed by PARE and described in Section 3.1.5. Properties that contain a UST but are not listed as a LUST site are generally those that do not have a known release, though these properties still have the potential to have released petroleum products.

3.1.7 Leaking Aboveground Storage Tanks (LAST)

The EDR Report did not identify any Leaking Aboveground Storage Tank (LAST) facilities within a ¼-mile of the Site.

3.1.8 Aboveground Storage Tanks (AST)

The EDR Report identified two registered aboveground storage tank (AST) sites within ¼-mile of the Site. Both ASTs are in locations presumed to be downgradient from the Site. Properties that contain an AST but are not listed as a LAST do not have a known release associated with it and therefore are not believed to be a significant threat of REC to the Site.

3.1.9 Other Databases

EDR searched several other databases in addition to those previously singled out for discussion. These databases are not among those required by ASTM and in many cases point to other databases also

searched by EDR and previously discussed in this ESA. The Site was not listed in any of these additional databases.

3.2 Local Regulatory Agency Interview

In addition to the file review, PARE also contacted local regulatory agencies regarding their knowledge as it relates to REC on or immediately abutting the Site.

- *Cumberland Fire Department* – PARE spoke with Captain Brian Jackvoney of the Valley Falls Fire Department on May 21, 2013. Captain Jackvoney was not aware of any REC at the Site or in the surrounding area. Captain Jackvoney stated that he does not have information about the Site that dates back to before the property was sold to the Town in the late 1960s. Captain Jackvoney also stated that he does not have any information on the abutting property to the south that is currently used as a parking lot, though at one time was a filling station with USTs. Captain Jackvoney believes it is owned by the Lusitania Club, which PARE later confirmed with a review of the Tax Assessor’s records at the Cumberland Town Hall.
- *Cumberland Planning Department* – PARE contacted the Cumberland Planning Department on May 21, 2013 but was unable to speak to anyone regarding their knowledge of the Site.
- *Cumberland Building Department* – PARE contacted the Cumberland Building Department but was unable to speak to anyone regarding their knowledge of the Site.
- *Cumberland Department of Public Works* – PARE provided Mr. Alan Brodd, the Cumberland Public Works Director, with a questionnaire to complete regarding his knowledge of the Site and surrounding area. His responses are discussed in the following section and the completed questionnaire is included as Appendix K.

Section 4

Site Reconnaissance and Interviews

4.1 General

PARE personnel visited the Site on May 30, 2013 for the purpose of gathering surficial information that may reflect potential REC. In addition, abutting properties were visually assessed for readily apparent conditions or activities, which through migration, may have resulted in the presence of REC at the Site. PARE had free access to the Site due to the fact that it is used as a Town-owned public park. As such, no Town personnel were onsite during the Site reconnaissance.

PARE photographed Site features during the Site reconnaissance. Selected Site photographs are provided in Appendix J. A summary of findings from the Site reconnaissance and interviews is provided in this section.

4.2 Site Reconnaissance

During the course of the Site reconnaissance, PARE personnel walked all areas of the Site, including the Skate Park, Basketball Court, Street Hockey Court, lawn areas, and property lines.

- The Site was found to be used partially for recreational sports and partially for leisure activities in a park setting with turf and foliage. Approximately 50% of the Site appears paved while the remainder of the Site is grass.
- The Site appears to slope from Chase Street toward Broad Street (west to east), though the southern part of the Site slopes to the south. A retaining wall was found along Chase Street that appears to be where the site was leveled to construct the basketball court.
- Surface drainage for the site appears to generally flow easterly and southerly. Two catch basins were identified on the Site on the southern property line. These two catch basins appear to intercept flow that would otherwise discharge onto the parking lot adjacent to the Site to the south, which is at a lower elevation. It is unknown whether these catch basins discharge to a closed drainage system or have open bottoms for subsurface infiltration.
- The Site contains four stadium lights that are powered by an underground electrical system. The underground electrical system originates from a concrete block building

onsite that is thought to contain electrical equipment. This building was found to be locked at the time of the Site reconnaissance. PARE could not directly identify the contents of this building, specifically whether it contains a transformer, electric panels, etc. However, based on the age of the improvements at the Site (i.e. 1990) it is presumed that this building and its contents were new as of at least this time, though PARE is not aware of the exact date of construction of this building.

- A water curb stop and manhole (thought to contain a water meter and/or valves) located at the southwestern corner of the property appears to be supplied from Chase Street. Based on the questionnaire filled out by the Town, the Site does not currently have Town water or sewer; therefore, it is thought that this curb stop and manhole are inactive.
- PARE did not identify any pavement staining or distressed vegetation on the Site.

PARE did not identify direct evidence of REC at the Site based on observations made during the Site reconnaissance. Based on the time of construction of the electrical building (post-1990), it is presumed that electrical equipment such as a transformer would be less than 25 years old and likely does not contain PCBs or other deleterious components that would pose a potential risk of REC at the Site.

4.3 Area Reconnaissance

Following the Site reconnaissance, PARE personnel performed a “windshield” survey of the area in the vicinity of the Site. The following observations were made:

- The Town Hall is located approximately 150 feet southeast of the Site, separated by Broad Street. Broad Street appears to be a major thoroughfare in Cumberland, and development along the street is primarily residential with some commercial development.
- Development to the north along Titus Street, south along Lusitania Avenue, west along Chase Street, and east along Broad Street is primarily residential.
- Club Juventude Lusitania, a Portuguese Youth Club located at 10 Chase Street, is a relatively large commercial use to the west of the Site. They also own the paved parking lot immediately to the south of the Site.
- While the Site has gentle slope from west to east toward Broad Street, the street itself is generally flat. Topography in the surrounding area generally slopes to the east toward Broad Street and south toward the Blackstone River.

- There is overhead electric and communication lines and underground water, gas, and sewer in Broad Street. Drainage is also located in Broad Street. The Site appears to have a water service located off Chase Street, but it does not use water according to Town personnel. The Site does not have sewer or gas service. The Site has under-ground and over-head electric and telecommunications service for lighting and security cameras on the Site.

4.4 Interviews

The current owner of the Site (Town of Cumberland) completed a questionnaire provided by PARE regarding their knowledge of the Site. The questionnaire was filled out by Mr. Alan R. Brodd, Town of Cumberland Department of Public Works Director and Ms. Kelly Morris of the Department of Planning and Development. A completed copy of the questionnaire is included as Appendix K. The completed questionnaire indicates that Town personnel are aware of current and prior uses in the surrounding area involving petroleum products or hazardous materials, which corroborates information obtained by PARE throughout the course of this ESA. The Town personnel interviewed are not aware of current or prior uses of petroleum products at the Site according to this questionnaire.

4.5 Geotechnical Investigation

During the week of July 8 through July 12, 2013, PARE's geotechnical engineers performed a geotechnical investigation at the Site, the purpose of which was to investigate the character and suitability of subsurface conditions for the future building foundation and structure. In addition to the geotechnical investigation, a number of subsurface borings were added to the southern property line to investigate if the former USTs on the southern abutting parcel (as shown on historic Sanborn Fire Insurance Maps), had impacted the Site with respect to REC. Specifically, three borings were completed along the southern property line to investigate if petroleum from the former USTs had migrated with shallow groundwater toward the Site; and if petroleum had migrated toward the Site, does it currently pose a threat of creating a vapor intrusion concern in the proposed school building.

It is important to note that over the course of this Phase I ESA, PARE identified no evidence that the former tanks had leaked. In addition, groundwater beneath and in the vicinity of the Site is believed to flow in a westerly or southerly direction, which means groundwater beneath the former tanks would likely flow away from the Site. However, given the proximity of the former USTs to the Site

and the uncertainty of the USTs final disposition, it was prudent to investigate the risk, even if low, of petroleum migration from the former USTs.

The three borings installed along the southern property line were identified as B13-4, B13-6, and B13-10. Each boring was advanced to refusal, which ranged from 6 to 14 feet below ground surface (refer to Appendix L – Geotechnical Boring Logs/Boring Location Plan). Refusal was determined to be either weathered bedrock or competent bedrock in all three borings. Groundwater was encountered in none (0) of the three borings. That is to say that evidence of shallow groundwater could not be discerned in shallow soil or the weathered bedrock layer in any of the three borings. As such, it appears very unlikely that petroleum from the former USTs could have migrated toward the Site via shallow groundwater flow. In turn, it appears unlikely that the former USTs on the southern abutting parcel pose a risk of vapor intrusion in the proposed school building.

Section 5 Findings and Conclusions

PARE has prepared this Phase I Environmental Site Assessment on behalf of Civic Builders for property located at 52 Broad Street in Cumberland, RI (Site).

The Phase I ESA included a Site reconnaissance; a review of available Site historical information and local, State, and Federal regulatory agency records; and interviews with personnel associated with operation and maintenance of the Site. The assessment was conducted in general conformance with ASTM Document E1527-05 – Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, as amended. PARE's findings and conclusions, which are summarized below, are based solely upon the work performed and are subject to the Limitations provided in Section 6.

Historical Records Review

The Site is identified as Tax Assessor's Plat 2 Lot 26 and is approximately 1.3 acres. Aerial photography shows that the Site contained a residential dwelling and adjacent automobile garage prior to about 1977. The Tax Assessor Field Card indicates that the Site was redeveloped into a recreational facility in 1990, which is evident in the 1995 aerial photograph (the scale and clarity of the 1992 aerial photograph makes it difficult to see the condition of the Site at that time). Based on the Tax Assessor database, the current owner (Town of Cumberland) of the Site acquired the property in 1968.

The Site is in an urban area with primarily residential development but with commercial and industrial development also present. Broad Street borders the Site to the east and appears to be a main thoroughfare in Cumberland. Development along Broad Street is mostly residential in the vicinity of the Site, with limited commercial development. Some industrial development can also be found in the vicinity of the Site, but these facilities do not directly abut the Site.

Several service stations are located along Broad Street, but none of them currently abut the Site. Review of Sanborn Maps from 1947 and 1965 show a service and filling station on an abutting parcel to the south of the Site. This service and filling station can be seen in the 1976 aerial photograph but appears to have been demolished in the 1981 aerial photograph. This property is owned by the Club Juventude Lusitania and is currently a paved parking lot, which appears to have been constructed sometime between 1977 and 1995. According to the Sanborn maps, underground storage tanks

(USTs) had been located on this property, though there is no record of them with the Town or the RIDEM. PARE could not determine whether these tanks were closed in place or removed, and our phone calls to Club Juventude Lusitania requesting additional information have yet to be returned. If these former USTs had impacted the Site, it would most likely have been through groundwater migration. However, based on the results of PARE's geotechnical investigation at the Site, which identified no evidence of shallow groundwater along the southern property line, it appears unlikely that these tanks could have impacted the Site with respect to REC.

The Blackstone River, which flows from north to south toward Narragansett Bay, is a major river and a significant water body in the area surrounding the Site. The Site is located approximately 600 feet to the north of the river, at its closest point. Groundwater underlying the Site and surrounding area is presumed to flow toward the river, in a westerly and southerly direction. The inferred direction of groundwater flow is supported by file information reviewed by PARE as well as the topography of the area, which is generally toward the river.

Regulatory Agency Records Review

On June 4th 2013 PARE reviewed RIDEM file information for available files for select properties abutting or in close proximity to the Site based on the findings identified in the EDR Report. Based upon a review of available and selected regulatory agency records, known releases exist in the area around the Site. None of the releases identified by EDR are on abutting parcels. Many of the releases identified in the vicinity of the Site occurred at locations either along Broad Street or further to the east and west of the Site, near the Blackstone River or Happy Hallow Pond.

Two releases, located at 94 Broad Street and 49 Abbott Street, appear to have impacted groundwater in the vicinity of the Site. Although groundwater at 94 Broad Street reportedly flows in a westerly direction, it is possible that this release has impacted groundwater beneath the Site to some degree based on its close proximity. The other release, located at 49 Abbott Street, appears to continue to impact groundwater based on file information reviewed by PARE. The groundwater flow direction at this location is reported to be in a southwesterly direction, possibly toward the Site. It appears that this release may have impacted the Site to some degree with respect to REC.

Site Reconnaissance

PARE personnel conducted a reconnaissance of the Site and surrounding area on May 30, 2013. PARE did not identify direct evidence of REC at the Site during the reconnaissance, such as pavement staining or distressed vegetation. While public sewer is present in the area, it is unknown

whether the former building at the Site was connected to it or if it used an on-Site system, such as a leach field or cesspool. Should such an on-site system have existed, it is possible that known or illicit discharges of hazardous waste were made to it, representing a potential REC.

Conclusions & Recommendations

While PARE did not find direct evidence of REC at the Site, is our opinion that the information obtained during the course of this Phase I ESA reflects the potential for REC at the Site. The Site is located in a heavily developed area with known release sites nearby, including those believed to be upgradient to the Site. It is likely that groundwater beneath the Site has been degraded to some degree as a result of these releases and its setting in a historically developed area, although that impact is not believed to be significant.

The property abutting the Site to the south, currently owned by Club Juventude Lusitania and used as a parking lot was reportedly a filling station with underground storage tanks (USTs) prior to 1977. PARE could not find records of these tanks with the Town or RIDEM and could not determine whether these tanks are still in place or if they were removed or closed. Despite the uncertainty of the final disposition of these tanks and no information on their potential spill history, it appears unlikely that these USTs have impacted the Site with respect to REC. This conclusion is based on the fact that no evidence of shallow groundwater was identified in three soil borings performed along the Site's southern property line. Without evidence of shallow groundwater along the common property line between the Site and the former USTs, it appears unlikely that a release of petroleum from these USTs could have migrated with groundwater toward the Site.

It is also possible that the past use of a cesspool or other wastewater disposal facility by the dwelling formerly located at the Site has resulted in the release of petroleum or hazardous materials to soil or groundwater, although PARE identified no evidence of any such cesspool or wastewater disposal facility. While public sewer is present throughout the area around the Site, it is unknown if the former dwelling was connected to it. Also, it is possible that the Site may have been backfilled with urban fill or remnants of the former dwelling following its demolition prior to development of the current park. While this does not represent REC, Civic Builders should be aware that this type of material could potentially be encountered during redevelopment of the Site and may require characterization and off-site disposal during construction. PARE recommends that during construction, the contractor performing the site work be made aware of the potential presence of wastewater disposal facilities and the potential presence of urban fill. Should such facilities or urban fill be encountered, the contractor should notify PARE, at which time the need for further investigation can be evaluated.

PARE does not believe that the potential RECs identified during the course of this ESA represent an imminent threat or warrant further investigation at this time. Special consideration was given to the potential for the former USTs on the abutting parcel to have impacted the Site by a release of petroleum and migration via shallow groundwater, and specifically the potential for that petroleum to create a vapor intrusion concern in the proposed school building. Given that no evidence of groundwater was identified in three soil borings performed along the common property line between the Site and the former USTs, it appears unlikely that a release of petroleum from the former USTs could have migrated with groundwater toward the Site. Because there is no evidence of groundwater along the southern property line, it appears unlikely that petroleum-impacted groundwater from these tanks, if present, would cause a vapor intrusion concern in the proposed school building.

Section 6 Limitations

PARE's findings and conclusions are based on its professional judgment concerning the significance of the limited data gathered during the course of the site assessment. PARE's site assessment has been conducted by employees of Pare Corporation in accordance with generally accepted engineering practices, consistent with standards of the industry for environmental site assessments and ASTM E 1527-05 and we observed that degree of care and skill generally exercised by other consultants under similar circumstances and conditions. Our findings and conclusions must be considered not as scientific certainties, but rather as our professional opinion, concerning the significance of the limited data gathered during the course of the environmental site assessment. No other warranty, express or implied, is made. Specifically, PARE does not and cannot represent that the Site contains no hazardous material, oil, or other latent condition beyond that observed by us during our site assessment.

This report is also subject to the scope of work contained in PARE's Proposal No. CP063.13 (dated February 19, 2013) addressed to Mr. Guy Morton of Civic Builders. This study and report have been prepared for Civic Builders solely for use in an environmental assessment of the Site. This report and the findings contained herein shall not, in whole or in part, be disseminated or conveyed to any other party, nor used by any other party in whole or in part, without the prior written consent of PARE. Our report is subject to the additional limitations listed below:

1. The observations described in this report were made under the conditions stated therein. The conclusions presented in the report were based solely upon the services described therein, and not on scientific tasks or procedures beyond the scope of described services or the time and budgetary constraints imposed by Civic Builders. The work described in this report was carried out in accordance with the scope of work and limitations described in PARE's proposal, a copy of which is provided in Appendix L.
2. In preparing this report, PARE has relied on certain information provided by State and local officials and other parties referenced therein, and on information contained in the files of State and/or local agencies available to PARE at the time of the site assessment. Although there may have been some degree of overlap in the information provided by these various sources, PARE did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this site assessment. PARE assumes

no responsibility for the accuracy of information obtained from interviews, information obtained, or the conclusions drawn from them.

3. In the event that bank counsel or title examiner for Civic Builders obtains information on environmental or hazardous waste issues at the Site not contained in this report, such information shall be brought to PARE's attention forthwith. PARE will evaluate such information and, based on this evaluation, may modify the conclusions stated in this report.
4. Observations were made of the Site and of structures on the Site as indicated within the report. Where access to portions of the Site or to structures on the Site was unavailable or limited, PARE renders no opinion as to the presence of hazardous material or oil, or to the structure. In addition, PARE renders no opinion as to the presence of hazardous material or oil, or to the presence of indirect evidence relating to hazardous material or oil, where direct observation of the interior walls, floor, ceiling or other portions of a structure, or, of the Site itself was obstructed by objects or coverings on or over these surfaces.
5. Unless otherwise specified in the report, PARE did not perform testing or analyses to determine the presence or concentration of asbestos or polychlorinated biphenyls (PCB's) at the Site or in the environment at the Site.
6. The purpose of this report was to assess the physical characteristics of the Site with respect to the presence in soil or groundwater of hazardous material or oil. No specific attempt was made to check on the compliance of present or past owners or operators of the Site with Federal, State, or local laws and regulations, environmental or otherwise.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

1902

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Pare Corporation (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

The EDR FieldCheck® System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. The EDR FieldCheck System accesses user-modified records from previously submitted reports. Any user-modified record from a previous report that is plotted outside the search radius of this report may not be included in this report.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). PARE CORPORATION used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by PARE CORPORATION. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

MA Financial Assurance.....	Financial Assurance Information Listing

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

An online review and analysis by PARE CORPORATION of the CERCLIS list, as provided by EDR, and dated 02/04/2013 has revealed that there are 2 CERCLIS sites within approximately 0.625 miles of the target property.

EXECUTIVE SUMMARY

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>PAWTUCKET WATER SUPPLY BOARD,</i>	<i>MYRTLE STREET</i>	<i>E 1/4 - 1/2 (0.411 mi.)</i>	<i>78</i>	<i>129</i>
<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>CENTRAL FALLS DUMP</i>	<i>ADJACENT VALLEY FALLS P WSW 1/4 - 1/2 (0.483 mi.)</i>	<i>84</i>	<i>149</i>	

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

An online review and analysis by PARE CORPORATION of the CERC-NFRAP list, as provided by EDR, and dated 02/05/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.625 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>DYTEX CHEMICAL CO</i>	<i>1280 HIGH ST</i>	<i>SE 1/4 - 1/2 (0.413 mi.)</i>	<i>79</i>	<i>132</i>

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

An online review and analysis by PARE CORPORATION of the RCRA-SQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 13 RCRA-SQG sites within approximately 0.375 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

RI AST: The Aboveground Storage Tank database contains registered ASTs. The data come from the Department of Environmental Management's Master List of AST Facilities & Their Associated Tanks.

An online review and analysis by PARE CORPORATION of the RI AST list, as provided by EDR, and dated 03/01/2012 has revealed that there is 1 RI AST site within approximately 0.375 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by PARE CORPORATION of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/12/2013 has revealed that there are 18 RCRA NonGen / NLR sites within approximately 0.375 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

An online review and analysis by PARE CORPORATION of the FINDS list, as provided by EDR, and dated 10/23/2011 has revealed that there are 7 FINDS sites within approximately 0.125 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

An online review and analysis by PARE CORPORATION of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1.125 miles of the target property.

EXECUTIVE SUMMARY

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
PAWTUCKET GAS CO	HIGH STREET	SSE 1 - 2 (1.025 mi.)	102	167

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by PARE CORPORATION of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 9 EDR US Hist Auto Stat sites within approximately 0.375 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by PARE CORPORATION of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 3 EDR US Hist Cleaners sites within approximately 0.375 miles of the target property.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: R010
Waste name: WASTE OIL

Hazardous Waste Summary:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information

from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

RI MANIFEST:

GEN Cert Date: 9/4/2002
Transporter Receipt Date: 6/7/2005
Number Of Containers: 3
Container Type: MA99
Waste Code1: MA99

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

SDWIS [WS] (Safe Drinking Water Information System (Water System)). Water Systems can have one or more water system facilities. The water system will purchase water from several facilities. Drinking water information is stored in EPA's SDWIS, which contains information about public water systems and their violations of EPA's regulations for safe drinking water. These statutes and accompanying regulations establish maximum contaminant levels (MCL), treatment techniques, and monitoring and reporting requirements to ensure that water provided to customers is safe for human consumption.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when

Site

Database(s)

EDR ID Number
EPA ID Number

PAWTUCKET WATER SUPPLY BOARD (Continued)

1000422221

complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal Brownfields sites

RI BROWNFIELDS: Brownfields Site List

Brownfields are real properties where the expansion, redevelopment or reuse may be complicated by the actual or potential presence of a hazardous substance, pollutant, or contaminant.

Date of Government Version: 10/02/2003	Source: Department of Environmental Management
Date Data Arrived at EDR: 10/07/2003	Telephone: 401-222-2797
Date Made Active in Reports: 10/21/2003	Last EDR Contact: 05/13/2013
Number of Days to Update: 14	Next Scheduled EDR Contact: 08/26/2013
	Data Release Frequency: Semi-Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

MA BROWNFIELDS: Completed Brownfields Covenants Listing

Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

Date of Government Version: 12/31/2012
Date Data Arrived at EDR: 01/11/2013

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/10/2012

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

	Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

	Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> PROVIDENCE, RI	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	44007C - FEMA DFIRM Flood data
Additional Panels in search area:	25005C - FEMA DFIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> PAWTUCKET	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches		Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: Hinckley

Soil Surface Texture:
Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches		Not reported	Not reported	Max: 705 Min: 141.14	Max: 6 Min: 3.6
2	9 inches	16 inches		Not reported	Not reported	Max: 705 Min: 141.14	Max: 6 Min: 3.6
3	16 inches	59 inches		Not reported	Not reported	Max: 705 Min: 141.14	Max: 6 Min: 3.6

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Water

Soil Surface Texture:
Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 5

Soil Component Name: Rock outcrop

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 5 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	0 inches		Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Map ID: 6

Soil Component Name: Carlisle

Soil Surface Texture:
Hydrologic Group: Class A/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	66 inches		Not reported	Not reported	Max: 42.34 Min: 1.41	Max: Min:

Soil Map ID: 7

Soil Component Name: Rippowam

Soil Surface Texture:
Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 23 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches		Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 7.3 Min: 4.5
2	5 inches	22 inches		Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 7.3 Min: 4.5
3	22 inches	64 inches		Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 7.3 Min: 4.5

Soil Map ID: 8

Soil Component Name: Pootatuck

Soil Surface Texture:
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches		Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6.5 Min: 4.5
2	11 inches	37 inches		Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6.5 Min: 4.5
3	37 inches	64 inches		Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6.5 Min: 4.5

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Classification Data

Source: Dept. of Administration/Statewide Planning

Telephone: 401-222-6483

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Community and Non-Community Wells

Source: Department of Environmental Management

Telephone: 401-277-2234

Includes Community, Non-Transient Non-Community and Transient Non-Community.

EPA-Approved Sole Source Aquifers in Rhode Island

Source: EPA

Sole source aquifers are defined as an aquifer designated as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for the area and for which there are no reasonable alternative sources should the aquifer become contaminated.

State Database: RI Radon

Source: Department of Health

Telephone: 401-222-2438

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX L

ENVIRONMENTAL QUESTIONNAIRE

**Phase I Environmental Site Assessment
Owner/Occupant Environmental Questionnaire**

Persons to be Questioned - The following questions should be asked of (1) the current owner of the property, (2) any major occupant of the property or, if the property does not have any major occupants, at least 10% of the occupants of the property, and (3) in addition to the current owner and the occupants identified in (2), any occupant likely to be using, treating, generating, storing or disposing of hazardous substances or petroleum products on or from the property. A major occupant is any occupant using at least 40% of the leasable area of the property or any anchor tenant when the property is a shopping center. In a multifamily property containing both residential and commercial uses, the preparer does not need to ask questions of the residential occupants.

(For any questions circled yes, please reference the appropriate question number(s) and explain as thoroughly as possible on the attached note pages following this questionnaire. If any additional information not covered in the following questions is known about the property or any adjoining property pertaining to hazardous substances and/or petroleum products, also include this on the note pages following this questionnaire.)

Definitions:

Property: The real property including buildings, improvements located on the property and affixed to the land. In this case, the property is:

52 Broad Street, Cumberland, RI

Adjoining Properties: Any real property or properties the border of which is contiguous with that of the property, or that would be contiguous with that of the property but for a street, road, or other public thoroughfare separating them.

Please list all adjoining properties on the attached notes pages.

Owner, Occupant and Site Visit Inquiry:

1a. To your knowledge, is the property used for an industrial use?

Yes

No

1b. To your knowledge, is any adjoining property used for an industrial use?

Yes

No

2a. Have you seen evidence or do you have any prior knowledge that the property has been used for an industrial use in the past?

Yes

No

2b. Have you seen evidence or do you have any prior knowledge that any adjoining property has been used for an industrial use in the past?

Yes

No

3a. To your knowledge, is the property currently or has the property in the past been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?

Yes

No

3b. To your knowledge, is any adjoining property currently or has any adjoining property in the past been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?

Yes

No

4a. To your knowledge, are there currently any uses of the property that involve petroleum products or other hazardous materials.

Yes

No

4b. To your knowledge, have there been any past uses of the property that have involved petroleum products or other hazardous materials?

Yes

No

4c. To your knowledge, are there currently any uses of the adjoining properties that involve petroleum products or hazardous materials?

Yes

No

4d. To your knowledge, have there been any past uses of the adjoining properties that have involved petroleum products or hazardous materials?

Yes

No

4e. To your knowledge, are there currently any uses in the surrounding area that involve petroleum products or hazardous materials?

Yes

No

4f. To your knowledge, have there been any past uses in the surrounding area that have involved petroleum products or hazardous material?

Yes No

5a. To your knowledge, is the property currently or has it been in the past used as a legal or illegal solid waste disposal site, transfer station, or dumping area?

Yes No

6a. To your knowledge, are there currently any registered or unregistered storage tanks (above ground or below ground) located on the property?

Yes No

6b. Have you seen evidence or do you have any prior knowledge that there have been previously, any registered or unregistered storage tanks (above ground or below ground) located on the property?

Yes No

7a. To your knowledge, are there currently any registered or unregistered leaking storage tanks (above ground or below ground) located on the property?

Yes No

7b. Have you seen evidence or do you have any prior knowledge that there have been previously, any registered or unregistered leaking storage tanks (above ground or below ground) located on the property?

Yes No

8a. To your knowledge, are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?

Yes No

8b. Have you seen evidence or do you have any prior knowledge that there have been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?

Yes No

9a. Have you ever experienced any strong, pungent, or noxious odors emanating from the property?

Yes

No

10a. Have you seen evidence or do have any prior knowledge of any pools of liquid, including standing water on the property, that may be or may contain petroleum products or hazardous materials?

Yes

No

11a. To your knowledge, are there currently any industrial drums (typically 55 gal (208 L)) or containers of chemicals located on the property or at the facility?

Yes

No

11b. Have you seen evidence or do you have any prior knowledge that there have been previously any industrial drums (typically 55 gal (208 L)) or containers of chemicals located on the property or at the facility?

Yes

No

12a. To your knowledge, are there currently any damaged or discarded automobile or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than 5gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the property or the facility?

Yes

No

12b. Have you seen evidence or do you have any prior knowledge that there have been previously any damaged or discarded automobile or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than 5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the property or at the facility?

Yes

No

13a. Have you seen evidence or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, unidentified substance containers, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the property?

Yes

No

14a. Have you seen evidence or do you have any prior knowledge that fill dirt that has originated from an unknown origin or a contaminated site, has been brought onto the property?

Yes

No

15a. To your knowledge, is there or has there been in the past a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCB's located on the property?

Yes

No

16a. To your knowledge, are there currently any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?

Yes

No

16b. Have you seen evidence or do you have any prior knowledge that there have been previously, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?

Yes

No

17a. To your knowledge, is there currently any stained soil or pavement on the property?

Yes

No

17b. Have you seen evidence or do you have any prior knowledge that there has been previously any stained soil or pavement on the property?

Yes

No

18a. Have you observed or do you have prior knowledge that there has been distressed vegetation on the property, other than for lack of water?

Yes

No

19a. To your knowledge, does the property discharge wastewater, other than storm water, into a sanitary sewer system or a combined sanitary/storm sewer system?

Yes

No

20a. To your knowledge, is the property currently or has the property been in the past, served by any private wells, non-public water systems, or dry wells?

Yes

No

20b. If the property is currently served by a private well or non-public water system or has been in the past, have you seen evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system?

Yes

No

N/A

20c. If the property is served by a private well or non-public water system or has been in the past, have you see evidence or do you have prior knowledge that the well has been designated as contaminated by any government environmental/health agency?

Yes

No

N/A

21a. To your knowledge, are there currently or have there been in the past, any septic systems or cesspools located on the property?

Yes

No

22a. To your knowledge, are there currently any drains, flooring, or walls located within any facility located on the property that are stained by substances other than water or are emitting foul odors?

Yes

No

22b. Have you seen evidence or do you have any prior knowledge that there have been previously, any drains, flooring, or walls located within any facility located on the property that have been stained by substances other than water or have emitted foul odors?

Yes

No

23a. Do you know what types of utilities are on the property (i.e. electric-above/under ground, gas, etc...)?

Yes

No

24a. Do you know what types of heating/cooling systems are on property?

Yes

No

N/A

25a. To your knowledge, has the owner or occupant of the property been informed of the current existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?

Yes

No

25b. To your knowledge, has the owner or occupant of the property been informed of the past existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?

Yes

No

25c. To your knowledge, has the owner or occupant of the property been informed of the current existence of environmental violations with respect to the property or any facility located on the property?

Yes

No

25d. To your knowledge, has the owner or occupant of the property been informed of the past existence of environmental violations with respect to the property or any facility located on the property?

Yes

No

26a. To your knowledge, does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or any facilities located on the property that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?

Yes

No

27a. To your knowledge, does the owner or occupant of the property have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?

Yes

No

28a. To your knowledge, does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?

Yes

No

APPENDIX M

PARE PROPOSAL NO. CP063.13

February 19, 2013

Guy Morton
Civic Builders
304 Hudson St. | 3rd Floor
New York, NY 10013

Re: **Phase I Environmental Site Assessment Services**
52 Broad Street, Cumberland, Rhode Island
(PARE Proposal No. CP063.13)

Dear Mr. Morton:

Pare Corporation (PARE) is pleased to have the opportunity to provide this Proposal and Agreement for Professional Services to Civic Builders (Client). Provided below is our understanding of the project, our proposed scope of services, and the basis of compensation for our services.

PROJECT UNDERSTANDING

Based on our recent conversations with you it is our understanding that Civic Builders is interested in the property at 52 Broad Street in Cumberland, Rhode Island (Site). The property is currently used primarily for recreation, with a skate park, tennis courts, and basketball courts. As part of the due diligence process, Civic Builders desires to have a Phase I Environmental Site Assessment conducted for the Site. Provided below is the scope of services PARE envisions for the successful completion of this project.

SCOPE OF SERVICES

PARE will conduct a Phase I ESA in general conformance with the American Society for Testing and Materials (ASTM) Document E 1527-05 - Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, as amended. The purpose of the Phase I ESA will be to evaluate the Site with respect to the potential presence of "Recognized Environmental Conditions". Per the ASTM document E 1527-05, "Recognized Environmental Conditions" shall mean the presence or likely presence of hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property.

The scope of the Phase I ESA specifically excludes an evaluation and/or identification of on-site building structures and soil for the presence of lead-based paint, asbestos containing building materials (ACBM), radon, and mold. Specific elements of the Phase I ESA will include:

- Site Reconnaissance – PARE will visually evaluate readily accessible portions of the Site for surficial indications of Recognized Environmental Conditions and identify general uses of abutting parcels.
- Records Review – Review historical (e.g., Sanborn fire insurance maps, city directories, historical topographic maps, aerial photographs) and regulatory records as appropriate and as readily available from state, federal and local agencies and/or other sources concerning the Site and nearby properties, in an attempt to ascertain information concerning past and present uses or

▼

practices that may reflect Recognized Environmental Conditions. We will request and review readily available files from the RIDEM for the Site and for selected properties and/or areas of concern identified in the data research company report that may impact the Site with respect to Recognized Environmental Conditions. Selection of properties and/or areas of concern for additional review at the RIDEM shall be based upon our professional judgment as to potential impact to the Site.

- Interviews/Inquiries – PARE will interview readily available persons associated with past and current ownership of the Site relative to the history and use of the Site, and any known Recognized Environmental Conditions associated with the Site.
- Interview of Local Government Officials – PARE will collect information from, and conduct interviews of readily available local regulatory and licensing agency officials regarding the Site, as required by the ASTM E 1527-05 document.
- Reporting – PARE shall prepare and submit to the Client a Phase I ESA report for the site. The Phase I ESA report will detail the scope of work provided, our findings, and conclusions, as well as a recommendation regarding further investigation, if warranted.
- One coordination meetings with the Client will be attended to discuss the Environmental Site Assessment report findings.

OUTSIDE SERVICES

PARE will utilize a Radius Map Report™ provided by Environmental Data Resources (EDR) as a starting point for our records review tasks. EDR will also provide historical topographic maps and Sanborn fire insurance maps (if available).

SERVICES PROVIDED BY THE CLIENT

The Client shall provide PARE with access to the Site as well as any available environmental records, including past reports or investigations of the Site, if available.

PERIOD OF SERVICE

The time period for performance of the services as set forth in the Scope of Services shall be approximately 45 days from receipt of a written authorization to proceed. Additional services may materially add to the time required to complete the work of the Project. PARE will be entitled to an equitable adjustment in the Period of Service as a result of services added.

BASIS OF COMPENSATION AND METHOD OF PAYMENT

Civic Builders shall pay Pare Corporation for the Scope of Services described above a Lump Sum Fee of **Four Thousand Eight Hundred Dollars (\$4,800.00)**.

Civic Builders shall make an initial payment of **Two Thousand Four Hundred Dollars (\$2,400)** as a retainer, upon execution of this Agreement. Upon receipt of the final deliverable, Civic Builders shall pay the remaining balance of **\$2,400.00**.

Mr. Guy Morton

(3)

February 19, 2013

Additional services can be completed and will be billed based upon actual accrued time and expenses in accordance with the attached Schedule of Fees.

Invoices for services rendered and expenses incurred will be submitted monthly and are due and payable upon receipt of the invoice. Invoices not paid within thirty (30) days shall be subject to a one and one-half percent (1.5%) per month interest charge. In addition, for contracts more than thirty days in arrears for payment, PARE may, with seven (7) days written notice, suspend services.

This represents our best judgment at this time as to the effort required to achieve the stated objectives. Should you change the Scope of Services or corresponding level of effort upon which this proposal is based an increase or decrease in charges may result. You will be notified of any change regarding an increase in charges and we will not exceed the recommended budget without your approval, nor will we be required to work beyond the approved budget.

PARE reserves the right to renegotiate or adjust our fee accordingly if our Proposal for Service is not accepted within a 60-day period.

ACCEPTANCE

This Proposal may be accepted by signing in the appropriate spaces below and returning one copy to us. Your signing of this letter constitutes your acceptance of all of the paragraphs included within the Statement of Terms and Conditions (Exhibit B), a copy of which is attached and made a part of this Agreement. Your return of a signed copy to PARE is interpreted as your Notice-to-Proceed unless otherwise stated. Please consult with us if there are any questions regarding this Agreement and the attached Terms and Conditions.

We look forward to working with you on this project. If you have any questions, please contact us at your convenience.

Sincerely,

Kenneth DeCosta, P. E.
Senior Vice President

Statement of Terms & Conditions dated February 19, 2013
Schedule of Fees dated February 19, 2013

This Proposal for Services and Statement of Terms and Conditions are hereby accepted and executed by a duly authorized signatory who, by execution hereof, warrants that he/she has full authority to act for, in the name of, and on behalf of Civic Builders.

CIVIC BUILDERS

By _____ Title _____

Typed Name _____ Date _____

STATEMENT OF TERMS AND CONDITIONS

Attached to and made a part of the Agreement for Professional Services dated February 19, 2013, by and between Civic Builders (Client) and Pare Corporation, (PARE) in respect of the Phase I Environmental Site Assessment Services (Project) described therein.

SECTION 1. SERVICES TO BE PROVIDED

1.1 PARE hereby agrees to provide Client with the services set forth in the Proposal for Services and under the terms and conditions set forth herein.

1.2 This Agreement, once executed, will become effective upon PARE's receipt of written authorization to proceed. The attendant Proposal for Service is subject to renegotiation if acceptance by this Agreement is not received within sixty (60) days.

1.3 Client acknowledges that work shall proceed under the defined scope of services only upon receipt by PARE of a signed Agreement (this Agreement) and, if required, a retainer payment. The retainer amount shall be held by PARE and shall be applied against the final invoice. In the event the amount of the retainer exceeds the final invoice, PARE shall refund the balance with the final invoice. If the final invoice exceeds the retainer, the Client shall promptly remit the amount due.

1.4 If CLIENT authorizes changes in the scope, extent, or character of the PROJECT, then the time for completion of PARE's services, and the rates and amounts of PARE's compensation shall be adjusted equitably.

1.5 If PARE's services include the performance of any services during the construction phase of the Project,

a. it is understood that the purpose of any such services (including any visits to the site) will be to enable PARE to better perform the duties and responsibilities assigned to and undertaken by it as an experienced and qualified design professional, and to provide Client with a greater degree of confidence that the completed work of the Contractor(s) will conform generally to the Contract Documents and that the integrity of the design concept as reflected in the Contract Documents has been implemented and preserved by Contractor(s). Neither the professional activities of PARE, nor the presence of PARE or his or her employees and subconsultants at a construction site, shall relieve the General Contractor and any other entity of their obligations, duties and responsibilities including, but not limited to, construction means, methods, sequence, techniques or procedures necessary for performing, superintending or coordinating all portions of the work of construction in accordance with the contract documents and any health or safety precautions required by any regulatory agencies. PARE personnel have no authority to exercise any control over any construction contractor or other entity or their employees in connection with their work or any health or safety precautions. Client agrees that the General Contractor is solely responsible for jobsite safety, and warrants that this intent shall be made evident in Client's agreement with the General Contractor. Client also agrees that Client, PARE and PARE's consultants shall be indemnified and shall be made additional insured under the General Contractor's general liability insurance policy.

EXHIBIT B

b. (*Shop Drawing Review*) it is understood that PARE shall review and approve or take other appropriate action on the Contractor submittals, such as shop drawings, product data, samples and other data, which the Contractor is required to submit, but only for the limited purpose of checking for conformance with the design concept and the information shown in the Construction Documents. This review shall not include review of the accuracy or completeness of details, such as quantities, dimensions, weights or gauges, fabrication processes, construction means or methods, coordination of the work with other trades or construction safety precautions, all of which are the sole responsibility of the Contractor. PARE's review shall be conducted with reasonable promptness while allowing sufficient time in PARE's judgment to permit adequate review. Review of a specific item shall not indicate that PARE has reviewed the entire assembly of which the item is a component. PARE shall not be responsible for any deviations from the Construction Documents not brought to the attention of PARE in writing by the Contractor. PARE shall not be required to review partial submissions or those for which submissions of correlated items have not been received.

c. it is understood that providing a Resident Project Representative (RPR) is a separately defined service in addition to those described above and that the use of a RPR is to assist in providing a more extensive observation of the Contractor's work. If RPR services are to be provided, the duties, responsibilities, and authority of the RPR are as set forth in Exhibit C. The furnishing of such RPR services will not limit, extend, or modify PARE's responsibilities or authority except as expressly set forth in Exhibit C.

SECTION 2. BILLING AND PAYMENT

2.1 Client agrees to pay PARE in accordance with the rates and charges set forth in the attached Proposal for Services. Invoices for services rendered and expenses incurred will be submitted monthly by PARE to Client. All such invoices shall be due and payable upon receipt. Additionally, in the case of a lump sum method of compensation, invoices will be based upon PARE's estimate of the proportion of the total services actually completed at the time of billing.

2.2 All invoices shall be paid in full prior to the filing by PARE of any documents with a governmental agency having jurisdiction over this Project.

2.3 In the event of a disputed or contested billing, only that portion so contested may be withheld from payment, and the undisputed portion will be promptly paid.

2.4 If Client fails to make any payment due PARE for services and expenses within thirty (30) days after the invoice date of PARE's statement therefor, the amounts due PARE shall include an interest charge at the rate of one and one-half percent (1.5%) per month from said thirtieth day, and in addition, PARE may, after giving seven (7) days written notice to Client, suspend services under this Agreement until he has been paid in full all amounts due him for services and expenses. Unless PARE receives payment in full within seven (7) days of the date of the notice, the suspension shall take effect without further notice. Payments on account will be credited first to interest and then to principal. In the event of a suspension of services, PARE shall have no liability to Client for delay or damage caused Client because of such suspension of services.

2.5 In the event of termination by Client under Section 17, Client shall remain liable for and shall promptly pay PARE the full amount for all services rendered by PARE to the date of termination and all termination costs together with interest on all overdue accounts in accordance with the foregoing rate and

EXHIBIT B

attendant attorneys' fees and costs of collection. No failure by PARE to exercise any right hereunder shall operate as a waiver nor preclude PARE from exercising any other right.

2.6 If Client fails to make payment to PARE in accordance with the payment terms herein, this shall constitute a material breach of this Agreement and shall be cause for termination by PARE.

2.7 In the event legal action is necessary to enforce the payment provisions of this Agreement, PARE shall be entitled to collect from Client any judgment or settlement sums due, reasonable attorneys' fees, court costs and expenses incurred by PARE in connection therewith and, in addition, the reasonable value of PARE's time and expenses spent in connection with such collection action, computed at PARE's prevailing fee schedule and expense policies.

2.8 Payment of invoices is in no case subject to unilateral discounting or set-offs by Client, and payment is due regardless of suspension or termination of this Agreement by either party.

2.9 Payment of invoices to PARE is the sole responsibility of the signatory of this Agreement and is not subject to third party agreements.

SECTION 3. ADDITIONAL SERVICES

3.1 Services required by Client, which are not part of those described in the Proposal for Services, shall be considered Additional Services. Additional Services shall be furnished by PARE, or obtained from others by PARE, if requested in writing by Client. Client shall pay PARE for Additional Services in accordance with rates and charges agreed to in writing prior to authorization by Client.

3.2 Requests for additional services and any associated fee adjustment must be authorized in writing before additional services can begin. Oral directives by Client authorizing Additional Services will be confirmed in writing by PARE. Client shall pay PARE for orally directed Additional Services furnished by PARE in accordance with PARE's current Schedule of Fees unless other rates and charges for compensation are agreed to prior to the completion of the authorized Additional Services. PARE reviews its Schedule of Fees annually and reserves the right to adjust its schedule accordingly.

SECTION 4. REIMBURSABLE EXPENSES

4.1 Normal reimbursable expenses are in addition to the fee for services. Internal expenses incurred and allocated to the project will be billed to Client in accordance with our fee proposal and/or our attendant Schedule of Fees. Outside expenses incurred and allocated to the project shall be billed at rate of 1.1 times the amount expended. Reimbursable expenses include, but are not limited to, expenses associated with the Project such as: travel including transportation, meals and lodging; printing, copying and handling of documents; computer charges including computer-aided design; film and processing; telephone calls and other communications charges; postage and delivery; equipment for tests; and securing approval of authorities having jurisdiction over the Project and not specified as part of the fee.

SECTION 5. CLIENT'S RESPONSIBILITIES

5.1 PARE shall indicate to Client the information needed for rendering of services hereunder. Client shall provide to PARE all criteria and full information as to Client's requirements for the Project and such other information as is available to Client and Client's consultants and contractors, and PARE shall be entitled to rely upon the accuracy and completeness thereof. Client recognizes that it is impossible for

EXHIBIT B

PARE to assure the accuracy, completeness and sufficiency of such information, either because it is impossible to verify, or because of errors or omissions that may have occurred in assembling the information Client is providing.

5.2 Client shall designate in writing a person to act as Client's representative with respect to the services to be rendered; shall examine and respond promptly to PARE's submissions; and shall give prompt written notice to PARE whenever he observes or otherwise becomes aware of any defect in the work.

5.3 Client shall arrange for access to and make all provisions for PARE to enter upon public and private property as required for PARE to perform his services.

5.4 Client acknowledges that invoices must be kept current for services to continue. If Client fails to pay any invoice due to PARE within 30 days of the date of the invoice, PARE may, without waiving any other claim or right against Client, suspend services under this Agreement until PARE has been paid in full all amounts due PARE and/or any of its Consultants and Subcontractors (See Paragraph 2.4). Sealed plans, final documents, reports and attendance at meetings/hearings will not be provided unless payment for services is current. Client acknowledges PARE's right to suspend services and withhold plans and documents, as provided above if payments are not current. If services are suspended for 30 days or longer, upon resuming services PARE shall be entitled to payment for expenses incurred in the interruption and resumption of services. If services are suspended for 90 days or longer, PARE shall be entitled to payment for expenses incurred in the interruption and resumption of its services, and fees for remaining services shall be equitably adjusted.

SECTION 6. INSURANCE

6.1 PARE is covered by Workers' Compensation Insurance, Commercial General Liability Insurance, Automobile Liability Insurance and Professional Liability Insurance. We will furnish information and certificates upon request.

SECTION 7. STANDARD OF CARE

7.1 Services provided by PARE under this Agreement will be performed in a manner consistent with that degree of care and skill ordinarily exercised by members of the same profession currently practicing under similar circumstances in the same locality.

SECTION 8. USE OF DOCUMENTS

8.1 All reports, plans, specifications, field data and notes and other documents, including all documents on electronic media prepared or furnished by PARE under this Agreement are instruments of service in respect to this Project, and PARE shall retain an ownership and property interest therein (including the copyright and the right of reuse at the discretion of PARE) whether or not the Project is completed. Client shall not rely in any way on any Document unless it is in printed form, signed or sealed by PARE or one of its Consultants.

8.2 A party may rely that data or information set forth on paper (also known as hard copies) that the party receives from the other party by mail, hand delivery, or facsimile, are the items that the other party intended to send. Files in electronic media format of text, data, graphics, or other types that are furnished by one party to the other are furnished only for convenience, not reliance by the receiving party. Any

EXHIBIT B

conclusion or information obtained or derived from such electronic files will be at the user's sole risk. If there is a discrepancy between the electronic files and the hard copies, the hard copies govern.

8.3 Because data stored in electronic media format can deteriorate or be modified inadvertently or otherwise without authorization of the data's creator, the party receiving electronic files agrees that it will perform acceptance tests or procedures within 60 days, after which the receiving party shall be deemed to have accepted the data thus transferred. Any transmittal errors detected within the 60-day acceptance period will be corrected by the party delivering the electronic files.

8.4 When transferring documents in electronic media format, the transferring party makes no representations as to long term compatibility, usability, or readability of such documents resulting from the use of software application packages, operating systems, or computer hardware differing from those used by the documents' creator. If any information is provided in electronic format, Client recognizes that such plans, documents or other information recorded on or transmitted as electronic media, including CADD documents ("Electronic Documents") are subject to undetectable alteration, either intentional or unintentional, due to, among other causes, transmission, conversion, media degradation, software error, or human alteration. Accordingly, the electronic documents are provided to Client for informational purposes only and not as record documents.

8.5 Client may make and retain copies of Documents for information and reference in connection with use on the Project by Client. PARE grants Client a license to use the Documents on the Project, extensions of the Project, and other projects of Client, subject to the following limitations: (1) Client acknowledges that such Documents are not intended or represented to be suitable for use on the Project unless completed by PARE, or for use or reuse by Client or others on extensions of the Project or on any other project without written verification or adaptation by PARE; (2) any such use or reuse, or any modification of the Documents, without written verification, completion, or adaptation by PARE, as appropriate for the specific purpose intended, will be at Client's sole risk and without liability or legal exposure to PARE or to PARE's Consultants; (3) Client shall indemnify and hold harmless PARE and PARE's Consultants from all claims, damages, losses, and expenses, including attorneys' fees, arising out of or resulting from any use, reuse, or modification without written verification, completion, or adaptation by PARE; (4) such limited license to Client shall not create any rights in third parties.

8.6 If PARE at Client's request verifies or adapts the Documents for extensions of the Project or for any other project, then Client shall compensate PARE at rates or in an amount to be agreed upon by Client and PARE.

SECTION 9. OPINIONS OF PROBABLE COST

9.1 Since PARE has no control over the cost of labor, materials, equipment, or services furnished by others, or over the Contractor(s)' methods of determining prices, or over competitive bidding or market conditions, his opinions of probable project cost and construction cost provided for herein are to be made on the basis of his experience and qualifications and represent his best judgment as an experienced and qualified professional engineer, familiar with the construction industry; but PARE cannot and does not guarantee nor make warranty, expressed or implied, that proposals, bids, or actual project or construction cost will not vary from opinions of probable cost prepared by him. Similarly, since PARE has no control over building operation and/or maintenance costs, PARE cannot and does not guarantee that the actual building or system operating or maintenance costs will not vary from any estimates given by PARE.

SECTION 10. CERTIFICATIONS

10.1 Client shall not request certifications and/or affidavits that would require knowledge or services beyond the scope of this Agreement and/or beyond the professional qualifications and engineering expertise of PARE. PARE shall not be required to sign any documents, no matter by whom requested, that would result in PARE having to certify, guaranty or warrant the existence of conditions whose existence PARE cannot ascertain. Any certification provided by PARE shall be so provided based on PARE's knowledge, information and belief subject to the preceding sentence, and shall be given in PARE's professional opinion consistence with the Standard of Care. PARE shall be compensated for any work necessary to verify project compliance with regulatory standards for purposes of such certification.

10.2 The proposed language of any such certificates, affidavits or certifications requested of PARE or PARE's consultants shall be submitted to PARE for review and approval at least fourteen (14) days prior to expected execution.

SECTION 11. LIMITATION OF LIABILITY

11.1 To the maximum extent permitted by law, Client agrees to limit PARE's liability to Client for or on account of all claims and/or damages of any nature whatsoever caused by or arising out of PARE's performance of its services, such that the total aggregate liability of PARE for any and all claims and/or damages of any nature whatsoever, arising out of the performance of PARE's services on the Project, shall not exceed \$50,000 or PARE's total fee for services rendered on the Project, whichever is greater.

11.2 Notwithstanding any other provision of the Agreement, neither party shall be liable to the other for any special, indirect, incidental, or consequential damages incurred due to the fault of the other party, regardless of the nature of this fault or whether it was committed by Client or PARE, their employees, agents, subconsultants or subcontractors. Consequential damages include, but are not limited to, loss of use and loss of profit.

SECTION 12. SERVICES MADE NECESSARY BY LACK OF CONTRACTOR PERFORMANCE

12.1 It is Client's responsibility to hire the Contractor, and it is the Contractor's responsibility to install and complete fully operable systems. Client agrees to pay PARE 3.20 times Direct Labor Costs for all its trouble-shooting work due to Contractor's inability to achieve satisfactory operation. Client shall hold harmless, defend and indemnify PARE, its officers, agents, employees and consultants, from any and all liabilities, claims, damages and suits arising out of the negligence of Client or its agents, or liability due to the negligence of any contractor(s) performing any portion of the work and supplying any materials, or any other parties, except for any liability of PARE, or its consultants, due to the sole negligence of PARE, or its consultants.

SECTION 13. HAZARDOUS WASTE/ASBESTOS/CONTAMINANTS

13.1 In consideration of the substantial risks to PARE involving or relating to the actual or threatened release, escape or discharge of hazardous waste, asbestos and/or other contaminants, it is agreed that Client to the fullest extent permitted by law, shall release and indemnify and hold harmless PARE and its consultants, agents and employees, from and against all claims, damages, losses and expenses, direct and indirect, including but not limited to attorneys' fees and defense costs, arising out of or resulting from the

performance of any services by PARE, or claims against PARE related to, involving or arising out of hazardous waste, asbestos or other contaminants.

SECTION 14. INDEMNIFICATION

14.1 PARE agrees, to the fullest extent permitted by law, to indemnify and hold harmless the Client, its officers, directors and employees (collectively, Client) against all damages, liabilities or costs, including reasonable attorneys' fees and defense costs, to the extent caused by PARE's negligent performance of professional services under this Agreement and that of its subconsultants or anyone for whom PARE is legally liable.

14.2 The Client agrees, to the fullest extent permitted by law, to indemnify and hold harmless PARE, its officers, directors, employees and subconsultants (collectively, PARE) against all damages, liabilities or costs, including reasonable attorneys' fees and defense costs, to the extent caused by the Client's negligent acts in connection with the Project and the acts of its contractors, subcontractors or consultants or anyone for whom the Client is legally liable.

14.3 Neither the Client nor PARE shall be obligated to indemnify the other party in any manner whatsoever for the other party's own negligence.

SECTION 15. SUSPENSION OF SERVICES

15.1 If the Project is suspended by Client, or the services are suspended by PARE in accordance with Paragraph 2.4 and/or Paragraph 5.4 of this Agreement for more than thirty (30) calendar days in the aggregate, PARE shall be compensated for services performed and charges incurred prior to receipt from Client or issuance by PARE of notice to suspend and, upon resumption, an equitable adjustment in fees to accommodate the resulting demobilization and remobilization costs. Depending on the duration of the stoppage, an additional adjustment may be necessary to cover wage increases and general escalation. In addition, there shall be an equitable adjustment in the project schedule based on the delay caused by the suspension. If the Project is suspended for more than ninety (90) calendar days in the aggregate, PARE may, at his or her option, terminate this Agreement upon giving notice in writing to Client.

SECTION 16. DISPUTE RESOLUTION

16.1 Any disputes arising out of or relating to this Agreement, including disputes under termination, shall first be submitted to nonbinding mediation unless the parties mutually agree otherwise.

16.2 The parties further agree to include a similar mediation provision in all agreements with independent contractors and consultants retained for the project and to require all independent contractors and consultants also to include a similar mediation provision in all agreements with subcontractors, subconsultants, suppliers or fabricators so retained, thereby providing for mediation as the primary method for dispute resolution between the parties to those agreements.

16.3 On the written notice of either party to the other of the election to submit any dispute under this Agreement to mediation, each party shall designate their representative and shall meet within ten (10) days after the service of notice. The parties themselves shall then attempt to resolve the dispute within ten (10) days of the meeting. Should the parties themselves be unable to agree on a resolution of the dispute, then the parties shall proceed with mediation in accordance with the mediation rules of the American Arbitration Association. The cost of mediation shall be borne equally by both parties.

16.4 Any dispute not settled by agreement of the parties shall be decided by litigation in a court of competent jurisdiction.

SECTION 17. TERMINATION

17.1 Either Client or PARE may terminate this Agreement at any time with or without cause upon giving the other party ten (10) calendar days prior written notice. Client shall within thirty (30) calendar days of termination pay PARE for all services rendered and all costs incurred up to the date of termination, in accordance with the compensation provisions of this Agreement.

SECTION 18. TITLES

18.1 The titles in this Agreement are for general reference only and are not part of the Agreement.

SECTION 19. GOVERNING LAW

19.1 The laws of the State of Rhode Island will govern the validity of this Agreement, its interpretation and performance. Any litigation arising in any way from this Agreement shall be brought in the courts of the State of Rhode Island.

SECTION 20. INTEGRATION

20.1 This Agreement comprises the final and complete agreement between Client and PARE. It supersedes all prior or contemporaneous communications, representations, or agreements, whether oral or written, relating to the subject matter of this Agreement. Amendments to this Agreement, except as otherwise provided herein, shall not be binding unless made in writing and signed by both Client and PARE.

SECTION 21. SEVERABILITY AND SURVIVAL

21.1 Any provision of this Agreement later held to be unenforceable for any reason shall be deemed void, and all remaining provisions shall continue in full force and effect. All obligations arising prior to the termination of this Agreement and all provisions of this Agreement allocating responsibility or liability between Client and PARE shall survive the completion of the services hereunder and the termination of this Agreement.

SECTION 22. SUCCESSORS AND ASSIGNS

22.1 Client and PARE each binds himself and his partners, successors, executors, administrators, assigns, and legal representatives to the other party of this Agreement and to the partners, successors, executors, administrators, assigns, and legal representatives of such other party, in respect to all covenants, agreements, and obligations of this Agreement.

22.2 Neither Client nor PARE shall assign, sublet, or transfer any rights under or interest in (including, but without limitation, moneys that may become due or moneys that are due) this Agreement without the written consent of the other, except as stated in paragraph 23.1 and except to the extent that the effect of this limitation may be restricted by law. Unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility

EXHIBIT B

under this Agreement. Nothing contained in this paragraph shall prevent PARE from employing such independent consultants, associates, and subcontractors as he may deem appropriate to assist him in the performance of services hereunder.

22.3 Nothing herein shall be constructed to give any rights or benefits hereunder to anyone other than Client and PARE.

SECTION 23. ENTIRE AGREEMENT

23.1 This Agreement contains the entire understanding of the parties with respect to the subject matter hereof and there are no verbal understandings, statements, or stipulations bearing upon the meaning or effect of this Agreement. This Agreement may only be modified or amended by a written instrument executed by both parties, except as may be otherwise provided herein.

(END)

SCHEDULE OF FEES

For Proposal for Services, dated February 19, 2013
(PARE Proposal No. CP063.13)

LABOR:

Engineering Technician	\$ 80.00/Hour
Engineer	\$ 90.00/Hour
Senior Engineer	\$ 100.00/Hour
Project Engineer	\$ 125.00/Hour
Senior Project Engineer	\$ 135.00/Hour
Managing Engineer	\$ 155.00/Hour
Principals & Officers	\$ 175.00/Hour
Planner/Scientist	\$ 75.00/Hour
Senior Planner/Scientist	\$ 90.00/Hour
Principal Planner/Scientist	\$ 125.00/Hour
Resident Project Representative	\$ 70.00/Hour
Senior Resident Project Representative	\$ 80.00/Hour
CADD Operator	\$ 80.00/Hour
Senior CADD Operator/Designer	\$ 95.00/Hour
Clerical/Office Personnel	\$ 60.00/Hour

REIMBURSABLE EXPENSES:

Mileage (at Federal Standard Rate)	\$ 0.565/Mile
Printing/Copying Wide Format (in-house)	\$ 0.15/Square Foot
Photocopying (in-house)	\$ 0.10/Copy
Outside Services and Out-of-Pocket Expenses	Cost plus 10%

The above rates for technical and support personnel will be charged for actual time worked on the project. In addition, there will be charges for time required for travel from company office to job or site, and return.

For expert and material witness services, including preparation, associated with any actual or potential litigation, mediation, arbitration, or similar proceeding, a fifty percent (50%) premium will be added to the above rates.

Overtime worked by non-exempt, non-professional employees will be charged at a rate of one and one-half times the rates shown above for all time worked in excess of 8 hours per day.
