Subject: TASC Deliverables: Providence CARE project under OEJ TASC WA

All,

Attached are the documents delivered to Steve Fischbach on Friday, Feb 3. The attached documents summarize TASC's review of the FYR report and other documents specified in the TD. TASC recommendations for improving the site monitoring and FYR report are included. If you have any questions about the documents, please don't hesitate to contact me.

Steve is contacting other community members to set up a meeting to discuss our work. We suggested meeting with the community members earlier on February 15 to help them prepare for the public meeting that evening. If this date doesn't work, we will try to meet with Steve and other community members at some later date before the public hearing.

Thank you.
Terrie
