Subject: Springfield Street School

Jeff,

We performed the quarterly monitoring at Springfield Street last week. During the soil gas well sampling we detected methane in monitoring well MPL-6 at 2.3% on March 21, and at 1.7% when we re-measured on March 22. MPL-6 is located on the north end of the property, adjacent to Hartford Avenue and the driveway into the middle school parking lot. This location was historically affected by a natural gas leak in Hartford Avenue.

We did not detect methane in any of the other soil gas monitoring locations, or in the subslab ventilation system monitoring.

We will monitor this well and adjacent wells MPL-5 and MPL-7 on a weekly basis for the next two weeks to determine the methane reading is persistent.

Thank you,
Donna
