Jeff,

LFR performed indoor air monitoring at the two Springfield Street Schools on October 22, 2009 for methane, carbon dioxide, oxygen, carbon monoxide, hydrogen sulfide, and organic vapors. All results were below RAWP action levels. We did not observe any unusual conditions. Results of monitoring will be included in the November Quarterly Monitoring report.

On October 26, 2009, we performed additional service on one of the blowers at the elementary school. All blowers are now operating.

Donna
