RE: Site Response Action Status Report – February 1 through 28, 2014
Former Tidewater Facility
Pawtucket, Rhode Island
RIDEM Case No. 95-022

The following summarizes response actions completed at the above-referenced site for the period February 1, 2014 through February 28, 2014.

SITE ACTIVITIES PERFORMED

- Performed Site visits to document security conditions and sheen observations, if present.
- Prepared and submitted to RIDEM a Supplemental Site Investigation Work Plan (SSIWP) describing additional soil and groundwater investigation activities for the Site. The investigations are designed to further evaluate results of the soil gas testing recently performed near the natural gas regulator station. The SSIWP was submitted to RIDEM on February 10, 2014 and an addendum letter was submitted to RIDEM on February 26, 2014. A public notification regarding the proposed investigation was distributed to the Tidewater mailing list on February 21, 2014. Copies of the SSIWP correspondence and notification letter can be found on National Grid's Tidewater website (www.tidewatersite.com).
- Prepared and distributed a public notification letter pertaining to the March 6, 2014 public meeting. The public notification was sent out to the Tidewater mailing list on February 11, 2014 and is available on National Grid's Tidewater website (www.tidewatersite.com).

FUTURE RESPONSE ACTION WORK/SCHEDULE

- Continue quarterly NAPL monitoring and recovery. The next event is scheduled for April 2014.
- Continue Site visits to document security conditions and sheen observations.
- Host a public meeting to present the results of the soil gas testing completed by National Grid at the Tidewater Site. The meeting is scheduled for 6:30 PM to 7:30 PM on March 6, 2014 at the Francis J. Varieur Elementary School. In addition to National Grid, representatives of RIDEM and EPA will attend.

- Perform drilling activities related to the limited soil and groundwater investigation program within the natural gas regulator station, as described in the February 2014 SSIWP. We currently expect drilling activities will be initiated on or about March 10, 2014, depending on weather and snow cover and will take 2 to 3 days to complete.

Please call me if you have any questions at 401-421-4140 Ext. 2719 or Michele Leone at 781-907-3651.
