SITE ACTIVITIES TO BE PERFORMED

- No site activities are planned for the week of March 17 to 21, 2014.
- Complete bimonthly Site observation walk during week of March 24 to 28, 2014.
- Perform drilling activities related to the limited soil and groundwater investigation program within the natural gas regulator station. These investigations are designed to further evaluate results of the soil gas testing recently performed near the natural gas regulator station. We currently expect drilling activities will be initiated during the week of March 24, 2014, depending on weather and snow cover and will take 2 to 3 days to complete. A public notification regarding the proposed investigation was distributed on February 21, 2014.

Please contact me at 401-421-4140 Ext. 2719 if you have any questions or comments.
