MEMORANDUM

To: Joseph Martella, RIDEM

From: Sophia Narkiewicz, GZA
Jim Clark, GZA

CC: Michele V. Leone, National Grid
William Howard, National Grid
Jesse Edmands, National Grid

Date: July 15, 2016

Re: Upcoming Site Response Action Report – Period from July 18th to July 29th, 2016
Former Tidewater Facility
Pawtucket, Rhode Island
RIDEM Case No. 95-022 / Site Remediation File No. SR-26-0934

SITE ACTIVITIES TO BE PERFORMED

- Complete bi-monthly Site observation walk during week of July 25th to July 29th, 2016.
- Finish mobilization and begin work activities associated with the drainage improvements and south washout restoration work. Earthwork activities are expected to be initiated during the week of July 18th. The work is expected to be complete by August 19th. The work is being conducted in accordance with a Short Term Response Action Plan (STRAP) which was approved by Rhode Island Department of Environmental Management (RIDEM) on April 19th, 2016. GZA will be on-site to manage the Contractor and document the STRAP activities and conduct air monitoring throughout the project. The air monitoring will be consistent with the site-specific, RIDEM-submitted Air Quality Monitoring Plan that includes a two-tiered approach during intrusive activities.
- As part of the above referenced STRAP, National Grid will support certain activities being performed by the City of Pawtucket associated with their Max Read Field (MRF) reconstruction project. This support will include assistance with excavation, management and transportation of certain excess materials from the MRF project to the Tidewater Site.

Please contact Jesse Edmands at 781-907-3682 if you have any questions or comments.
