

Level 3: SESC Inspections

Prerequisite: Level 1

StormwaterONE Course Name: : **CI213: Qualified Compliance Inspector of Stormwater (QCIS) – Rhode Island**

What Is It About?

The main objective of this course is to equip you with the skills to properly inspect and maintain a construction site in compliance with Rhode Island regulations.

Who Should Take This Course?

- Regulatory Enforcement Inspectors
- Non-regulatory Third Party Inspectors
- Civil Consultants/Students
- Environmental Consultants/Students

What Will I Get Out Of It?

This course will provide you with a complete understanding of the principles and practices of erosion, runoff, and sediment control, pollution prevention and good housekeeping measures, and the proper reporting and documentation requirements for onsite inspections.

You will learn how to:

- Identify the steps necessary to inspect construction sites.
- Determine possible causes of control measure ineffectiveness and how to correct them.
- Explain how to complete an inspection report and document corrective actions.
- Summarize the communication process necessary between owner, operators, contractors, and stormwater pollution plan designer so the site stays in compliance throughout the construction project.

You will also receive:

16 PDHS*
