RE: Site Response Action Status Report – February 1st to February 29th, 2016
Former Tidewater Facility
Pawtucket, Rhode Island
RIDEM Case No. 95-022 / Site Remediation File No. SR-26-0934

The following summarizes response actions completed at the above-referenced site for the period February 1st, 2016 through February 29th, 2016, as well as planned activities.

SITE ACTIVITIES PERFORMED

- Performed Site visits to document security conditions and sheen observations, if present.

FUTURE RESPONSE ACTION WORK/SCHEDULE

- A Short Term Response Action Plan (STRAP) was submitted to RIDEM on January 25th, 2016 which summarized the proposed activities related to a drainage repair and the restoration of the south washout area. The complete STRAP was posted to National Grid's Tidewater website (www.tidewatersite.com). After RIDEM has reviewed the STRAP, National Grid plans to host a public meeting to present the proposed STRAP activities. We expect the proposed STRAP activities to be performed during the summer of 2016, pending necessary approvals.
- Continue quarterly NAPL monitoring and recovery. The next event is scheduled for April 2016.
- Continue Site visits to document security conditions and sheen observations.
