

Facility Name	Contact	Phone
<b>T Check off the appropriate boxes so that proper air pollution estimates can be made. Organize your data to try to optimize data quality</b>		
" No. of Bulk Storage Tanks for VOCs other than fuel oil _____		
" Mixing Room personnel mix formulations to our own specifications	"	Mixing Room has general ventilation and/or floor sweeps
" Mixing Room personnel merely stir formulations already in drums	"	Mixing Room has all VOC emissions vented to air pollution control equipment
" Fabric Coating	" Fabric Printing	" High Solids Coating
" Paper Coating	" Roller	" Water-Borne Coating
" Large Appliances	" Rotary Screen	" Dip
" Magnet Wire Surface Coating	" Flat Screen	" Spray
" Surface Coating of Autos & Light Trucks		" Ultraviolet Coating
" Metal Can Coating	" Paper Printing	" Electrostatic Spray
" Metal Coil Coating	" Flexographic Printing	" Interior Coating
" Metal Furniture Surface Coating	" Rotogravure Printing	" Exterior Coating
" Wood Furniture Surface Coating	" Roll Printing	" Filler
" Surface Coating of Flat Wood Paneling	" Packaging Rotogravure Printing	" Sealer
" Surface Coating of Plastic Parts	" Publication Rotogravure Printing	" Electrodeposition
" Surface Coating of Large Ships	" Specialty Printing	" Adhesive
" Surface Coating of Large Aircraft	" Lithography	" Paint
" Surface Coating of Miscellaneous Metal Parts	" Letter Press	" Enamel
" Surface Coating of Steel Drums		" Varnish/Shellac
" Vinyl Coating	" Printing/Other (specify) _____	
" Wood Product Coating	" Pressure Sensitive Tape	
" Surface Coating/Other (specify) _____	" Formulation/Other (specify) _____	

For each VOC control device utilized by your facility, report the following data:

RI DEM Approval No.					
# days operated June - August, 2017					
# days operated all other months, 2017					
# days by-passed June - August, 2017					
# days by-passed all other months, 2017

Detailed Spreadsheet for Surface Coaters, Printers and Users of Volatile Formulations  
Weight % data

Facility Name: \_\_\_\_\_  
 Production Line: \_\_\_\_\_  
 Substrate for Formulations on this Spreadsheet: \_\_\_\_\_

This spreadsheet presents data from:  
 ^ June - August No. of Summer Days: \_\_\_\_\_  
 ^ All Other Months

These should add  
 <<< up to 100% >>>

Solvent Names Continue in Alphabetical Order with CAS No. >>>>

COATING, INK OR FORMULATION NAME	2017			WEIGHT	CALCULATED	(WT %)	(LBS.)	(WT %)	(LBS.)	(WT %)	(LBS.)	(WT %)	(LBS.)
	AMOUNT USED (GALS.)	PERCENT SOLIDS (WT %)	TOTAL VOC (WT %)	OF ONE GALLON (LBS.)	TOTAL VOCs* (LBS.)								

TOTAL EMITTED OF EACH SOLVENT (lbs.):  
 TOTAL VOC (lbs.):

\* Calculated Total VOCs = (amount of coating used (gals) x weight of 1 gallon (lbs)) x (total VOC weight % / 100)

\*\* Overall Efficiency = Capture Efficiency x Destruction Efficiency

• If there are many water-based formulations, add a column in your spreadsheet for % water.  
 • Please provide chemical analysis of the waste disposed, if available, for proper credit.  
 • Emission Statement Sources only:  
 Apportion and record stack emissions, fugitive emissions, and calculated fuel emissions on Emissions Summary Table. Follow Rule Effectiveness Guidance if you used air pollution control equipment.

## Instructions for Supplemental Chemical Use Survey

**Regulated Substance** - List all Volatile Organic Compounds (VOC) **and** all chemicals listed on the list entitled “Listed Toxic Air Contaminants” that were used at and/or emitted from the facility. Provide a CAS number, usually available on your MSDS. **Please note that all miscellaneous volatile organic compounds (VOCs) used in excess of 100 pounds must be reported even if the name is not specifically listed on the Listed Toxic Air Contaminants List.**

**Type of Operation** - Describe the process in which the listed substance was used (for example, degreasing, plating, wipe cleaning, etc.).

**Starting Inventory** - Report the amount of the substance present on site at the start of the year, if known. State whether the amount is given in pounds or gallons. Please provide data in pounds if possible.

**Amount Purchased** - Report the amount of the substance purchased in 2017 and indicate whether the number given is in pounds or gallons. Again, provide data in pounds if possible.

**Ending Inventory** - Report the amount of the substance present on site at the end of the year, if known. State whether the amount is given in pounds or gallons.

**Amount Manifested** - Report the amount (in pounds) of the regulated substance which was manifested as hazardous waste and the percentage of that waste that was this chemical.

**Amount of Substance Released to Air** - Calculate the amount of the substance emitted to air. Include both fugitive and stack emissions. **Attach documentation of the calculations used.** You may find it necessary to make other mass balance adjustments such as an amount disposed in a landfill or discharged to a POTW. Label carefully.

**Describe Air Pollution Control Equipment** - Provide a short description of the equipment used to control emissions of the regulated substance, if any. Examples follow:

Type: Carbon adsorber, venturi scrubber, VOC incinerator, baghouse, etc.  
Include RI DEM Approval Number, if known.

Capture: Give the capture efficiency for this chemical.

Overall: Give the overall control efficiency of the control equipment for this chemical.  
Overall Efficiency = Capture Efficiency x Destruction or Recovery Efficiency

*Note: On a separate sheet, please provide any additional information pertinent to your processes or air pollution control equipment that will assist us in calculating an accurate emissions estimate from your facility for 2017*
