For each VOC control device utilized by your facility, report the following data:

RI DEM Approval No.					
# days operated June - August, 2018					
# days operated all other months, 2018					
# days by-passed June - August, 2018					
# days by-passed all other months, 2018

Note: Misc. VOCs include isopropyl acetate (CAS 108214) and methyl amyl ketone (CAS 110530) only.

* Total VOCs can be calculated with this equation: (amount of coating used (gals) x weight of 1 gallon (lbs)) x (total VOC weight % / 100)

** Please provide chemical analysis of the waste coating/ink/formulation if available.

- „ Please indicate if water is included in the coating/ink/formulation. If there are many water-based formulations, add a column in your spreadsheet for % water.
- „ On a separate sheet, please provide a list of any air pollution control equipment for the coating or printing process and the capture and destruction efficiencies of the equipment.
- „ Acetone may be included in order to show a full accounting of the formulation. Operating Permit fees, if applicable, will not be assessed on delisted chemicals.

Air Pollution Inventory Form D, Page 3

Instructions for Supplemental Chemical Use Survey

Regulated Substance - List all Volatile Organic Compounds (VOC) **and** all chemicals listed on the list entitled “Listed Toxic Air Contaminants” that were used at and/or emitted from the facility. Provide a CAS number, usually available on your MSDS. **Please note that all miscellaneous volatile organic compounds (VOCs) used in excess of 100 pounds must be reported even if the name is not specifically listed on the Listed Toxic Air Contaminants List.**

Type of Operation - Describe the process in which the listed substance was used (for example, degreasing, plating, wipe cleaning, etc.).

Starting Inventory - Report the amount of the substance present on site at the start of the year, if known. State whether the amount is given in pounds or gallons. Please provide data in pounds if possible.

Amount Purchased - Report the amount of the substance purchased in 2018 and indicate whether the number given is in pounds or gallons. Again, provide data in pounds if possible.

Ending Inventory - Report the amount of the substance present on site at the end of the year, if known. State whether the amount is given in pounds or gallons.

Amount Manifested - Report the amount (in pounds) of the regulated substance which was manifested as hazardous waste and the percentage of that waste that was this chemical.

Amount of Substance Released to Air - Calculate the amount of the substance emitted to air. Include both fugitive and stack emissions. **Attach documentation of the calculations used.** You may find it necessary to make other mass balance adjustments such as an amount disposed in a landfill or discharged to a POTW. Label carefully.

Describe Air Pollution Control Equipment - Provide a short description of the equipment used to control emissions of the regulated substance, if any. Examples follow:

Type: Carbon adsorber, venturi scrubber, VOC incinerator, baghouse, etc.
Include RI DEM Approval Number, if known.

Capture: Give the capture efficiency for this chemical.

Overall: Give the overall control efficiency of the control equipment for this chemical.
Overall Efficiency = Capture Efficiency x Destruction or Recovery Efficiency

Note: On a separate sheet, please provide any additional information pertinent to your processes or air pollution control equipment that will assist us in calculating an accurate emissions estimate from your facility for 2018
