2015 Brownfields Remediation and Economic Development Fund

Announcement of Request for Proposals (RFP)

September 23, 2015
Updated October 1, 2015

All proposals due by close of business October 26, 2015

The Rhode Island Department of Environmental Management (the Department) is pleased to announce the availability of grants to assist in the development and facilitation of brownfield remediation projects. In accordance with the *Rules and Regulations for the Brownfields Remediation and Economic Development Fund (Fund Regulations)*, this Request for Proposals (RFP) is seeking proposals for brownfield site redevelopment projects that will support the clean up of contaminated property and contribute to the state's economic development, including through the creation of jobs in Rhode Island. Many acres of brownfields occupy desirable commercial/industrial space within the urban corridor. Remediation and redevelopment of these sites not only mitigates the threat to public health and the environment from exposure to uncontrolled contamination, but it also can create and attract jobs, revitalize streets and neighborhoods, and increase the local tax base.

1. Purpose of Available Grants

The purpose of the grant program created for the Brownfields Remediation and Economic Development Fund ("Brownfields Fund") is to stimulate the clean-up and redevelopment of Brownfields sites across Rhode Island. The grant program, specifically the criteria for evaluating and prioritizing applications, provides funding support and technical assistance to facilitate and accelerate the return of brownfields to productive re-use and strengthen Rhode Island's economic base. In general, these funds should be used to clean up sites in Rhode Island, create jobs, assist small businesses, and add to the tax base of the communities where they are utilized.

2. Applicant Eligibility

Applicants eligible to apply for the above listed grants include Government or Public entities, Non-Profit entities, and Private/Non-Governmental entities that are proposing projects on brownfield sites and have real economic development impact, create jobs, leverage private funds, and return under-utilized properties to beneficial re-use.

In general, applicants for Brownfields Funds must be the entity that legally controls the brownfield site. Private consultants are not eligible to receive grant awards directly on behalf of their clients.

Applicants must demonstrate administrative capacity to manage their grant funds and comply with applicable state and federal fiscal requirements including, but not limited to, accounting, recordkeeping, procurement, and reporting procedures. Applicants must also demonstrate ability to manage their project, document matching funds, and report of progress of deliverables specified in a grant agreement.

Please be aware that it is the Department's policy that financial assistance shall neither directly or indirectly benefit parties whose willful action or inaction has resulted in damage to the environment. At the Director's discretion, the Department may restrict, delay, or limit funding due to the occurrence of criminal, civil enforcement actions, or compliance matters. To be eligible for grants, applicants must disclose any existing violations and compliance actions related to their proposal. This includes the issuance of any Notice of Intent to Enforce.

3. Project Eligibility

As outlined in the *Fund Regulations*, the following types of costs are eligible to receive grant monies from the Brownfields Fund:

- Soil, groundwater, soil gas, indoor air, and infrastructure/building materials investigation;
- Site Assessment;
- Remediation;
- Hazardous material abatement and/or waste disposal;
- Long term groundwater, indoor air, soil gas, and other environmental monitoring;
- Institutional controls;
- Environmental consulting costs; and/or
- Other environmental investigations, compilation of information, marketing materials, design, or site work required to support reuse/development of the Brownfields site.

Examples of types of costs that are ineligible to receive grant monies from the Brownfields Fund include:

- a. Pre-award costs, unless incurred within ninety (90) days of application approval and have been pre-approved by the Department;
- b. Administrative costs including clerical support, monthly utility expenses, the purchase of office equipment, personnel costs associated with fund raising for the non-governmental entity, etc.;
- c. Costs associated with the performance of a Supplemental Environmental Project ("SEP");
- d. State or Federal lobbying costs, penalties, or fines;
- e. Land acquisition projects that do not have tangible public health or environmental benefits and physical construction or redevelopment;
- f. Response costs for emergency response actions caused or exacerbated solely by the applicant or their agents or assigns; and/or

- g. Proposed projects associated with unresolved litigation (administrative or judicial) with the Department or conditions or activities that have violated or are violating statutes or regulations administered by the Department shall be ineligible to receive Fund monies without the express written consent of the Director and the resolution of said litigation or violation(s).

Please be aware that the Department and the State of Rhode Island take no responsibility for project work done outside the term or scope of a valid grant agreement or prior to full approval of an agreement. Agreements are not valid until the Rhode Island Department of Administration issues the appropriate encumbrance (i.e. purchase order (PO) or PO release). All agreements must be signed and dated by an authorized agent of the applicant and the Department.

Eligibility of expenses may vary with the type of grant application. Eligible expenses may include the costs of personnel salary and fringe, travel, supplies, constructions, and contractual services. With respect to personnel, the Department generally will not subsidize salaries of existing governmental staff, but rather encourages such expenses to be allocated as match.

Applicants may not apply for more than one Grant Category in Section 4 in the same calendar year.

4. Available Grant Categories

4.1 –Pre-Development Planning/Site Selection Grants

Pre-Development Planning or Site Selection Grants are for determining the feasibility of a Brownfields redevelopment project. These grants are small grants that can be used for the initial efforts to build off past site investigations and assessment work to determine the options and costs of remediation and/or the development of a brownfields site as well as the development of detailed marketing plans and public outreach.

RIDEM reserves the right to limit the annual Individual Grant Amount in this category to \$20,000 at its sole discretion.

Qualifying expenditures under Pre-Development Planning/Site Selection Grants shall include items such as:

- File Reviews;
- Development of a Site Investigation Work Plan (SIWP);
- Meetings with those that have site and/or relevant regulatory knowledge;
- Public and Community Outreach;
- Developing/executing marketing plans;
- Project Cost Analysis;
- Other costs associated with a feasibility determination, as deemed appropriate by the review committee; and/or

- Collection and compilation of other environmental investigations, information, marketing materials, design, or site work required to support reuse/development of the Brownfields site.

4.2 – Site Preparation Grants

Site Preparation Grants are for sites already identified as a Brownfield based on previous Phase I and site investigation work but do not yet have an approved RAWP. The purpose of this type of grant is to fill in the gaps that may exist in the previously obtained site investigation data, develop and analyze potential remedial strategies, and ultimately end with an approved Remedial Action Work Plan that satisfies the regulatory requirements in the Remediation Regulations and can be simultaneously implemented during redevelopment of the Brownfield.

RIDEM reserves the right to limit the annual Individual Grant Amount in this category to \$100,000 at its sole discretion.

Qualifying expenses under a Site Preparation Grants shall include:

- File review;
- Development and implementation of a SIWP;
- Development of an Supplemental Site Investigation Report (SSIR) to obtain a Program Letter from the Department;
- Analysis of Remedial Alternatives;
- Completion of any public notice requirements in accordance with the Remediation Regulations;
- Development of a RAWP; Other costs to complete tasks required to obtain a Remedial Approval Letter (RAL) or Order of Approval (OA), as deemed appropriate by the review committee; and/or
- Collection and compilation of other environmental investigations, information, marketing materials, design, or site work required to support reuse/development of the Brownfields site.

4.3 – Redevelopment Grants

These grants are for the Brownfield sites that already have completed and approved site investigations and an approved Remedial Action Work Plans (RAWPs), via a Remedial Approval Letter (RAL) or an Order of Approval (OA) issued by the Department's Office of Waste Management. Redevelopment Grants are meant to fund the actual remediation and redevelopment of a Brownfields site to bring the site into productive reuse.

RIDEM reserves the right to limit the annual Individual Grant Amount in this category to \$500,000 at its sole discretion.

Qualifying expenses under a Redevelopment Grants shall cover costs associated with remediation and redevelopment such as:

- Implementation of the approved RAWP;
- Equipment costs;
- Hazardous material abatement and waste disposal;
- Sub-Contractor costs;
- Long term environmental monitoring;
- Institutional controls;
- Reporting costs;
- Marketing and public outreach;
- Other costs required to fully implement the RAWP and complete redevelopment, as deemed appropriate by the review committee; and/or
- Collection and compilation of other environmental investigations, information, marketing materials, design, or site work required to support reuse/development of the Brownfields site.

4.4 – Small Business Assistance Grants

Small Business Assistance Grants are for small businesses which are existing companies currently located on a brownfields site without the resources to address contamination. The goal of these grants is to provide the capital to investigate and clean up the site in a manner protective of public health and the environment while simultaneously restoring the value of the underlying property asset and supporting the long-term financial viability of the existing small business.

RIDEM reserves the right to limit the annual Individual Grant Amount in this category to \$50,000 at its sole discretion.

Qualifying expenses can include those listed under both the Site Preparation Grants and the Redevelopment Grants, depending on the point at which the site is within the Site Remediation process.

5. Project Time Periods

The grant awards will be authorized via grant agreements for a limited period of time. Due to greater emphasis being placed on the timeliness of expenditures by the State, projects that will be completed in one or two year time period will be favored. With adequate supporting justification, the Department will consider longer project time periods for larger, more complex projects. Projects not promptly initiated or that fall substantially behind schedule once underway may have their grant awards rescinded or reduced. The Department encourages applicants to take into consideration and to plan adequate time for procurement and obtaining permits or other approvals in their project schedule.

6. Match Requirements

“Match” refers to the funds of services used to conduct a project that are not borne by grant funds. All projects match must: (1) relate directly to the project for which the match is being applied; (2) be reasonably valued; and (3) be supported by documentation. Match is an indicator of local commitment to a project and is considered in proposal eligibility and rank. The Brownfields Funds will be available to eligible applicants in the form of grants of up to eighty percent (80%) of eligible costs. Applicants must be able to match at least twenty percent (20%) of eligible costs. At the Director’s sole discretion, a grant for less than eighty percent (80%) of eligible costs may be awarded based on site remediation and redevelopment characteristics.

Match may include: (1) cash; (2) the value of non-cash, in-kind contributions (e.g. value of equipment donated for use of the project); or (3) the value of goods and services directly contributed to the project. In-kind services may be considered as credit towards the 20% match at the sole discretion of the Review Committee.

Examples of actions that might be used as eligible match include the following:

- Cost of value-per-hour rate multiplied by the number of hours performing work associated with the project proposal tasks such as labor, bid or subcontract development, development of designs, permit reviews including attending meetings pertaining to such, conducting public meetings, or similar work relating to the project but not directly funded by the grant;
- Cost of materials, supplies, or equipment rentals used for the project; and/or
- Cost of construction (including labor, equipment, and materials).

7. Public Workshop

A public workshop to review the RFP process and clarify guidance for potential grant applicants has been scheduled as follows:

Public Workshop	Date:	September 30, 2015
	Time:	1:30-3:00
	Location:	RIDEM Headquarters, Room 300 235 Promenade Street, Providence

8. Updated RFP Information

During the application period, as the need arises, the Department may post additional information concerning this RFP and funding opportunity on its website. This may include clarification of commonly asked questions. Potential applicants are advised to periodically check the Department’s website.

9. Proposal Evaluation Criteria

Project proposals will receive an initial screening by representatives of the Department's Office of Waste Management for basic eligibility criteria. To be awarded a grant, applicants must possess adequate fiscal and project management capabilities. Past performance on prior Department grants will be taken into account when assessing organizational capacity to effectively manage a project. Eligible proposals will be referred to interagency review committee(s). The interagency review committee will evaluate the eligible proposals consistent with the scoring criteria developed in conjunction with the *Brownfields Regulations* and applicable state requirements in order to make recommendation subject to final decision by the Director.

Scoring criteria address:

- Economic impact, private funds leveraged, permanent jobs the redevelopment will produce, and other public benefits (30%);
- Timeframe for the proposed project and readiness to proceed/provide environmental and economic impact (15%);
- Beneficial impact to the environment through remediation and stormwater controls (20%);
- Capacity of applicant to develop and manage this project moving forward, project team, past experience, likelihood of success/full implementation (15%);
- Expansion of existing businesses that create more permanent jobs and tax benefits (or tax benefit only for new businesses and construction) (5%); and
- Estimated costs and cost effectiveness or assessing and remediating the Brownfield site to get it ready for development (15%).

10. How to Apply – Final Submission Deadline – Monday, October 26, 2015

Final proposals must be received by the Department no later than 4:00 p.m. on Monday, October 26, 2015. The proposal must include mandatory application forms (either form A or B), and other supporting materials as appropriate; e.g. site plan, letters of support, photographs, etc. The Department encourages that proposals be sent electronically (Microsoft Word format). Hard-copies will also be accepted. Refer to Appendix A.

11. Preparing the Proposal for Final Approval

For projects that are selected, the Department may request the applicant to modify project proposals based on comments received during project evaluations and the selection process. The applicant must submit the revised project proposal/scope of work to the Department prior to final approval. The Department will conduct a final review of the proposal in coordination with appropriate agencies and, if satisfied that all review comments have been adequately addressed, the final proposal or scope of work will become the basis for the grant agreement that will be executed to formalize the grant award.

12. Project Administration

12.1 Grant Agreements – Grant announcements will be made periodically, but not less than bi-annually (twice every fiscal year) on a competitive basis or until funds for that grant period are exhausted. Successful applicants will receive a grant offer specifying the amount, duration and conditions of the award. The offer will be in the form of a binding contract. Other requirements to secure funding shall be the following:

- Recipients will be required to sign, accept and return the offer to the Department within forty-five (45) days of the date of mailing. Failure to execute the agreement within the forty-five (45) days may result in the cancellation of the grant award and may result in these funds being awarded to the next highest rated project;
- Recipients will have ninety (90) days from the date of the acceptance of the grant offer to provide proof of the necessary grant match by letters of credit, loan agreements, dedicated escrow accounts or any other pre-approved proof of matching funds by the Department; and
- The recipient is responsible for obtaining all necessary permits or approvals from any federal, state, or local agency with authority over the project or project area. Copies of these permits/approvals must be submitted to the Department for inclusion in the project file before the first payment request.

All grant payments will be paid in the form of reimbursement payments for eligible expenses incurred in accordance with an approved project. Please refer to Section 3 above for examples of eligible and ineligible costs. Requests for reimbursement must include documentation of the incurred, eligible costs. Such type of documentation required to receive reimbursement will be detailed in the grant offer and/or grant agreement. Grant recipients must enter into an agreement with DEM to establish mutually agreeable terms for completing the project. Items in the agreement include, *but are not limited to*:

- Scope of work including tasks, schedules and deliverables (The approved project proposal is usually incorporated as the scope of work);
- RIDEM and sponsor responsibilities, including interim and final reporting requirements;
- Statement of the project's total budget, matching budget, and grant;
- Statutory and regulatory requirements for contracting such as competitive bidding, fair-share allotments, i.e., minority-owned and women-owned business enterprises (MBE/WBE);
- Requirements for subcontracting;
- Project payment schedule and payment terms; and/or
- Record-keeping and reporting.

Payments will be made on a reimbursement basis in accordance with the payment schedule and terms contained in the project agreement. Reimbursement is tied to performance targets and payments are not scheduled more frequently than once a month.

Grant recipients will be required to provide regular progress reports to RIDEM. Projects are expected to be completed in the timeframe of the grant agreement. Timeframes will be negotiated in the range of 6-24 months. Time extensions will not be granted without specific and appropriate justification.

13.2. Pre-project and Pre-contract Costs - RIDEM and the State of Rhode Island take no responsibility for project work done outside the term or scope of the grant agreement or prior to full approval of a grant agreement. Applicants should NOT anticipate any funding for work that is done before approval of a grant agreement. Agreements are not valid until the Rhode Island Department of Administration issues the appropriate encumbrance (i.e., purchase order). All agreements must be signed and dated by an authorized agent of the sponsor and RIDEM.

13.3 Procurement - The expenditure of funds pursuant to these grants is subject to state law governing procurement, including requirements for competitive bidding and goals for participation by minority or woman business enterprises (MBE/WBE). In general, where consultant, engineering or construction services are to be obtained, a competitive process is required. Where a municipality has retained engineering or consultants under a prior competitive solicitation, DEM may allow that arrangement to be utilized for a project, provided adequate documentation is provided that the services sought were within the anticipated scope of services under the original solicitation, and that the manner of pricing is consistent with applicable requirements. RIDEM reserves the right to review and approve the award of any contract or subcontract.

13.4 Permitting - Many grant projects will require a permit from RIDEM or CRMC or review by another governmental agency to proceed. Applicants should consider the time needed to acquire permits and other agency reviews and plan projects accordingly. Failure to obtain and comply with permits is generally considered a material breach of a grant agreement and may jeopardize project funding.

13.5 – Suspension, modification or revocation - The Director may suspend, modify or revoke any awards granted pursuant to these regulations in the event that subsequent examination reveals any data included in an application form, submittal, reimbursement request, plan or sketch to be incorrect or not in compliance with these regulations.

13.6 – Stop Payment - The Director may take appropriate action to stop payment of and/or seek the return of grant funds expended for any project where: (1) the applicant has obtained said grant based upon incomplete, false, misleading or erroneous information; or (2) the applicant has not completed the work approved under the grant in accordance with any and all conditions of approval issued by the Director in the grant award.

Appendix A: Final Application Content & Forms

Your completed application should include the following:

FORM A: Required Applicant and Project Information for Pre-Development Planning/Site Selection

FORM A: Required Applicant and Project Information for Site Preparation

FORM B: Required Applicant and Project Information for Redevelopment

FORM B: Required Applicant and Project Information for Small Business Assistance

Site/Location Map
(if applicable)
