**Subject:** Springfield Street school  
Jeff,

We performed the monitoring at the Springfield Street School complex last week. During the soil gas sampling, carbon dioxide concentrations over the action level of 0.1% were detected in 17 out of 29 sampling locations. Carbon dioxide concentrations over 0.1% were also detected at 5 of 7 system monitoring locations. Concentrations inside the building did not exceed 0.1%. No other parameters were detected at concentrations over the action levels.

We will provide detailed information in the quarterly monitoring report.
