INSPECTION of COMMERCIAL FEEDS, FERTILIZERS

and LIMING MATERIALS - 2007

Mr. Pete Susi, Mr. Ronald Newman,* and Mrs. Gail Ficazzola***

The Rhode Island Commercial Feed Law, Fertilizer Law and Liming Materials Law are similar to those laws of most other states. They are based on "Uniform State Bills" proposed by the Association of American Control Officials.

Essentially, the laws require that all Commercial Feeds, Fertilizers Composts and Liming Materials be registered with the Department of Environmental Management, Division of Agriculture and be properly labeled before being sold in Rhode Island.

COMMERCIAL FEEDS

Commercial feeds are defined as all materials sold as feed or for mixing in feed. Some exceptions are - whole unmixed seeds, meals made from entire unmixed seeds, hays, silages, and "customer formula feeds". In addition to the usual farm feeds, commercial feeds include feeds for dogs, cats, hamsters, fish, canaries and other pets as well as feeds for wild birds.

The essential labeling requirements for commercial feeds are that each package or bulk lot of feed must be labeled with the name of the feed, the net weight, the name and address of the manufacturer, guarantees of the minimum percentages of crude protein and crude fat, a guarantee of the maximum percentage of crude fiber and a list of the feed's ingredients. Pet feeds labeled "complete" must meet requirements of the National Research Council's Committee on Animal Nutrition. Medicated feeds require additional labeling to insure safe and effective use.

Registrations are for the calendar year and all expire on December 31. A fee of sixty dollars (\$60.00), is charged for each feed product registered. There are no tonnage fees. Feed materials that are labeled "For Mixing Purposes Only" are exempt from registration fees, but must be labeled in the same manner as other feeds.

A summary of the results of all feed inspections is reported in Table 1. "Guarantees Failed" are those found deficient by amounts exceeding permitted analytical variations. The complete record of the feed analyses is reported in Table 2.

FERTILIZERS

The essentials labeling requirements for fertilizers are that each package or bulk lot must bear a label or bulk delivery invoice clearly stating the brand name including the grade numerals, the name and address of the manufacturer and the net weight. The grade numerals in the brand name must be minimum guarantees of the percentages of nitrogen (N), available phosphorus (as P₂O₅) and soluble potassium as (K₂O). They must be listed in that order. Additional claims for water insoluble nitrogen or for minor fertilizer elements must be substantiated by minimum guarantees. These additional guarantees are not permitted in the grade numerals. They must be listed separately.

Fertilizer registrations are for the calendar year and all expire on December 31. Registration fees are seventy two dollars (\$72.00) per product or grade and a tonnage fee of 15 cents per ton is assessed for fertilizers sold in any size container or in bulk. Tonnage fees are based on the manufacturer's declaration of Rhode Island sales for the annual period ending June 30th of each year.

A summary of the results of all fertilizer inspections is reported in Table 3. The complete record of the fertilizer analysis is given in Table 4.

All fertilizers claiming nitrogen must be guaranteed for the minimum percentage of total nitrogen (N). Those claiming organic or slowly-available nitrogen must also be guaranteed for the minimum percentage of water insoluble nitrogen.

All fertilizers claiming phosphorus must be guaranteed for the minimum percentage of available phosphorus (as P_2O_5). Exceptions are: unacidulated rock phosphate, bone, tankage, dried animal manure, dried sewage sludge and other natural phosphorus sources. These exceptions may be guaranteed for total rather than available phosphorus provided grade numerals are not used. Fertilizers claiming potassium must be guaranteed for soluble potassium (as K_2O).

LIMING MATERIALS

Liming materials must be labeled with the brand name, name and address of the manufacturer and the net weight. Guarantees are required for the minimum percentage of calcium oxide (CaO), magnesium oxide (MgO), and the calcium carbonate neutralizing equivalent. In addition there must be guarantees of the minimum percentages passing through 20 mesh and 100 mesh sieves.

Registrations of liming materials are for the calendar year and all expire on December 31. The registration fee is twenty dollars (\$20.00) for each product registered. There are no tonnage fees but manufactures must report the annual tonnage of their sales in Rhode Island.

All persons selling Feeds, Fertilizers or Liming Materials in Rhode Island should become familiar with the details of the applicable Rhode Island Laws. Copies are available from the Rhode Island Department of Environmental Management, Division of Agriculture, 235 Promenade Street, Providence, Rhode Island 02908. Phone (401) 222-2781. or at <http://www.dem.ri.gov>.
