

Toilet Paper Tube Bat Craft

What you will need:

- A toilet paper tube
- A pipe cleaner
- Construction paper
- Scissors
- A pencil
- Crayons or markers
- A glue stick
- A hole punch

How to:

Punch two holes at the bottom of the toilet paper tube and fold the top half to make ears. Cut the pipe cleaner in half to make the legs, and feed them through the holes to make feet. Use a pencil to trace wings on a piece of construction paper. You can use your hand (fingers closed) as a guide, or can draw your own wing outline. Cut out the wings, and glue them on the back of the toilet paper tube. Add eyes, nose, mouth, and teeth, and you have yourself a bat!
