

Pet Waste Station and Leash Bags Purchasing Information

The following websites are vendors for pet waste disposal products. This list is not meant to be comprehensive, nor is it intended to be an endorsement of these vendors. It is merely a guide to places from which pet waste disposal products can be obtained and the approximate prices of their products. Prices were obtained in the fall of 2008, and are subject to change. Bulk discounts might be available, so we recommend that interested towns or organizations collaborate to achieve maximum cost efficiencies.

DOGIPOT (<http://www.yuckos.com/dogipot.html>) – DOGIPOT sells a wide array of pet waste clean-up products. Complete pet waste stations include bag dispensers, covered waste receptacle, signs, waste bags, post and mounting hardware (\$335). Individual components such as bag dispensers and replacement bags are also available separately.

JJB Solutions (<http://www.petwastestations.com/>) – JJB Solutions also offer complete pet waste stations of varying sizes and component options (\$315-498). Again, individual components may be purchased separately.

JeffersPet.com (<http://www.jefferspet.com/ssc/depts.asp?CID=0&BrowseList=43>) - JeffersPet.com is a discount pet supply company that carries pet waste clean-up products including waste bag dispensers that attach to leashes (“Bags-On-Board”, “Li'l Pals” or “Gotta Go” from \$4-15 each).

Bella Bagno, Inc. (<http://www.bellabagno.com/PetSolutions.htm>) – Bella Bagno advertises a single line of complete pet waste stations, leash purses with scented waste bags and waste bag dispenser capsules.

BAGGIT, Inc. (<http://www.baggitrwe.com/index.htm>) 407-732-4797 – BAGGIT supplies complete pet waste stations (\$199 for plastic, \$335 for aluminum with discounts for 3 or more units) and their components, as well as “Dog Valets” (\$469). “Dog Valets” are pet waste stations utilizing a stone/concrete receptacle similar to those used in public ashtrays.

Doggie Dooley (<http://www.doggiedooley.com/>) – Doggie Dooley sells a waste disposal system designed to work like a miniature septic tank, utilizing enzyme and bacteria action to reduce dog waste to a ground absorbing liquid (\$89.95).
