

Calculating Nitrogen Removal Using Pet Waste Station Refill Information

When you refill the Pet Waste Station with bags please record the following information:

1. Date of refill	2. Number of bags placed in station	3. Number of bags left in station	4. Number of bags used	5. Number of days since last refill	6. Estimated amount of pet waste removed in lbs	7. Estimated amount of nitrogen removed in lbs
			(# bags placed in station last time - # bags left in station)	(subtract today's date from the date of previous refill)	(number of bags used x 0.26)	(number of bags used x 0.0031)
Calculations:						
First refill date:		0	0
