

Level 2: Introduction

Prerequisite: Level 1

StormwaterONE Course Name: **CI113: Stormwater Management for Construction Activities – Rhode Island**

What Is It About?

The main objective of this course is to provide you with a deeper understanding of the principles and practices of erosion control, runoff control, sediment control, and pollution prevention on a construction site.

Who Should Take This Course?

Anyone involved in the planning, review, or implementation of land disturbance activities in the state of Rhode Island, including:

- Municipal staff and other regulated MS4s
- RIDOT, RIDEM, and CRMC managers, staff, and contractors
- Field staff responsible for SESC installation and maintenance
- Builders, developers, and subcontractors

What Will I Get Out Of It?

This course will enhance your understanding of a wide variety of erosion, runoff, and sedimentation control measures. It will expand your knowledge of construction site good housekeeping and pollution prevention measures, and it will introduce you to the fundamental protocols of onsite inspections.

You will also receive:

6 PDHS*
