

Level 4: SESC Plan Preparation

Prerequisite: Level 1

StormwaterONE Course Name: **CP213: Qualified Preparer of Stormwater Pollution Prevention Plans (QPSWPPP)**

What Is It About?

The main objective of this course is to provide you with the training to write and update a compliant Soil Erosion and Sediment Control (SESC) Plan (or SWPPP) for construction sites. You also will learn how to properly inspect and maintain a construction site in compliance with Rhode Island regulations.

Who Should Take This Course?

- Regulatory Enforcement Inspectors
- SESC Plan/SWPPP Preparers/Reviewers/Administrators
- Non-regulatory Third Party Inspectors
- Civil Consultants/Students
- Environmental Consultants/Students

What Will I Get Out Of It?

This course will provide you with a complete understanding of the principles and practices of erosion, runoff, and sediment control, pollution prevention and good housekeeping measures, the proper reporting and documentation requirements for onsite inspections, and the process for preparing a SESC Plan. With this course, you will receive both the QCIS and QPSWPPP credentials.

You will learn how to:

- Identify the steps necessary to inspect construction sites.
- Determine possible causes of control measure ineffectiveness and how to correct them.
- Explain how to complete an inspection report and document corrective actions.
- Document the required information associated with preparing and maintaining the SESC Plan through all phases of construction activity.
- Summarize the communication process necessary between owner, operators, contractors, and the stormwater pollution plan designer so the site stays in compliance throughout the construction project.

You will also receive:

18.5 PDHS*

Your QCIS and QPSWPPP Credentials Listed on StormwaterONE.com

* You will be eligible to use this training for other professional development requirements. See our website for details.
