

The Water Cycle

The Water Cycle

Water Cycle Wristband

All the earth's water is part of an endless cycle called the *water cycle*.

The water cycle goes on and on and never ends.

Through this cycle, nature cleans and moves water from the ocean to the air to the land and back again.

Directions:

1. Thread the different-colored beads on the string in any order.
2. Place the string around your wrist and tie it.
3. By rotating the beads around your wrist, you have created a water cycle.

WATERMATTERS.ORG • 1-800-423-1476

COLOR	REPRESENTS	DESCRIPTION
YELLOW	solar energy	energy provided by the sun for the never-ending water cycle
CLEAR	evaporation	vapor created when the sun heats water in lakes, streams, rivers or oceans
GREEN	transpiration	vapor created when plants and trees give off moisture
WHITE	condensation	tiny droplets of water formed when water vapor rises into the air and cools
BLUE	precipitation	moisture released when clouds become heavy and form rain, snow, hail, etc.
BROWN	percolation	movement of water through the ground
