

Personal Protective Equipment for Go Kits in Animal Disease Response

DEM recommends that responders to an animal disease outbreak have the following available for personal protection:

- Eye protection, such as
 - Indirect-vent, fog-free, splash-proof goggles with clear lenses (e.g., UVEX S3400X or equivalent)
 - “Bandit” safety glasses with amber lenses (e.g., UVEX S1601 or equivalent)
- Hand protection, such as
 - Nitrile, powder-free gloves
 - Powdered, latex gloves
- Coveralls, such as
 - Disposable Tyvek coveralls with hoods but not booties (e.g., Dupont Pro Shield NG127S or equivalent)
- Head covering, such as
 - Disposable Tyvek bouffant hats (e.g. Dupont TY667S or equivalent)
- Boots, such as
 - Easily disinfected rubber boots
 - Disposable Tyvek boot covers with solid, no-skid bottoms (e.g. Dupont Gripper IC446SOC or equivalent)
- Respirators, such as
 - N95 particulate respirators with an exhalation valve (e.g., 3M 8511 or equivalent)
- Hand sanitizer, such as
 - Instant sanitizer (e.g., Purell or equivalent)
- Disinfectant, such as
 - Peroxygen (e.g., Virkon S or equivalent)
 - Chlorhexidine
 - Chlorine bleach
- Disinfectant applicator, such as
 - 5-gallon bucket and boot brush
 - 2-gallon handheld compression tank sprayer
 - 4-gallon backpack sprayer (e.g., Gempler’s D.B. Smith G80062 or equivalent)
- Duct tape
- Garbage and/or bio-hazard bags
- Restricted-area tape
